

The open side of the upgraded path is to be secured by a boundary treatment to prevent conflict between farmland and the PROW

Land Dedication: Dashed red line represents the increased 5 metre width to PROW40 to be agreed with Rockley estate and EOS Inc.

The species rich hedgerow on the western side of PROW40 is to be retained and shall remain unimplicated by the upgrade works

Any lighting erected on or adjacent to the path is to be carefully considered. It should be downward directional and of the correct power/ luminance so as not to affect bat commuting routes

Where the PROW passes through species rich hedge rows, the gap created will be 3.5 not 5m.
