Design & Access Statement

12 Tempest Ave, Darfield, S73 9 BJ

Design of Studio: Visually the outside of the garage will not change. Only when the roller door on the garage is opened will a double glazed window and door be situated on the inside of the garage behind the roller door, this will add security and added insulation to building. All remaining walls and the ceiling are to be insulated and boarded. To the rear of the garage will be fitted units and worktops including sink with an outside soak away system (to be used for hand wash purposes only). All electrics to be fitted by a professional electrician, lighting to be provided by down lighters in specific areas.

Parking: The only change to the parking facility is that it has now been layed with tarmac, making up even more room for parking. But only one client at any one time will be in the premise and so will be positioned ether on the drive way or infront of our premise.

Hours of Work: Thursday/Fridays 9-8pm
Saturdays: 9-4pm (only maybes worked every other Saturday)
