Resources

The Modern interlocking tile is a flat, smooth, single-lap interlocking design with a slate-like appearance enhanced by a broken bond laying pattern.

All of our concrete interlocking tiles can achieve an 'A+' rating (the lowest environmental impact) in the Building Research Establishment's Green Guide to Specification (* element ref: 812410007, 812410018, 812410049).

Accreditation to the BES 6001 framework standard for 'Responsible Sourcing' means that projects using our concrete tiles can now achieve extra credits under BREEAM and The Code for Sustainable Homes. [Click here to find out more.](#)

Have you also considered the Edgemere interlocking slate range? With an 18mm thin leading edge, Edgemere provides an affordable upgrade to standard interlocking tiles and comes in Standard, Riven or Duo formats, providing three distinct and slate-like finishes. [Click here to find out more](#)

Please note The British Standard for Slating and Tiling (BS 5534) has recently been updated, making significant changes to tile fixing requirements. To ensure that your roof is compliant to the new standard, our fixing specification service is available and can be accessed by clicking [here](#)
