

the authors' experience with the use of representative samples for other papers within the same publication in the volume. The key point is that the authors of all of the articles in the volume have been given the opportunity to review and comment on the volume. Therefore, the volume is the result of a broad consultation with the community, and the authors of the volume are responsible for any shortcomings or errors. Any shortcomings will be reported accordingly.

This architectural drawing shows the elevation of a building facade. The structure features a prominent gabled roof with a series of horizontal lines indicating a tiled or corrugated surface. The main body of the building is a long, single-story structure with a dark gray finish. It includes several windows: a small square window on the left, a larger multi-paned window in the center, and a tall, narrow white door on the right. A small, square white window is also visible on the right side of the main facade. To the far left, there is a smaller, two-story section with a patterned facade. The building is set on a light gray base, and a small, dark, rectangular structure is visible on the far right.

Architectural elevation drawing of a building facade. The drawing shows a gabled roof with a chimney. The facade features a central entrance with a staircase, flanked by large windows and doors. The drawing is labeled '1C' and '9I'.
