

We are astounded at the size of this proposed development you are planning to build, our members feel it is far too large for our area and the damage it will cause to our precious environment, it will be larger than the existing villages, the identity of each we all want to keep for the history of our town and not to be just another bricks and mortar place which will spoil our beautiful countryside between the villages concerned.

So therefore we cannot support this application in its present form, but we do need a new link road to bypass Higham village, because Higham common road is not suitable for the type of traffic which it is currently used for.

We fully support the Group Keep it Green proposals and we urge you to listen to us and to think most seriously what damage you are creating to our environment over the coming years here in Barnsley.

So as a Church we say to you most strongly please **KEEP IT GREEN.**
