

Ref: Change of use to C2 – Residential Institute

Dear Planning,

Further to your request, I can confirm the following:

Age of Residents

At this address, residents will be of childbearing age. This is a parenting assessment centre where parents come to be assessed on their abilities to care for their children. A parent(s) and their at-risk child will reside on the property.

Length of stay

The length of stay at the centre is a maximum of 12 weeks (this is the assessment period)

Care provided

The centre is a professional assessment centre, and staff do not provide personal care on-site. However, there will be parenting classes and specialised training for parents. All parents and their children, including visitors, will be closely monitored using staff observations and CCTV in all areas of the property, including the grounds. All monitoring is used in line with our policy and the Information Commissioner's Office (ICO).

Number of staff and visitors to the property

Six staff will attend the property during the day and two at night. Visits will be periodically, and these will consist of solicitors or social workers completing their assessments. The property's parking area has ample spaces and a limited flow of people or traffic, with no disturbance to the area.

I hope this has given you more information that was needed to support our application to change the use.

Kindest regards

Craig White
Managing Director/ Owner
