Proposed Layout

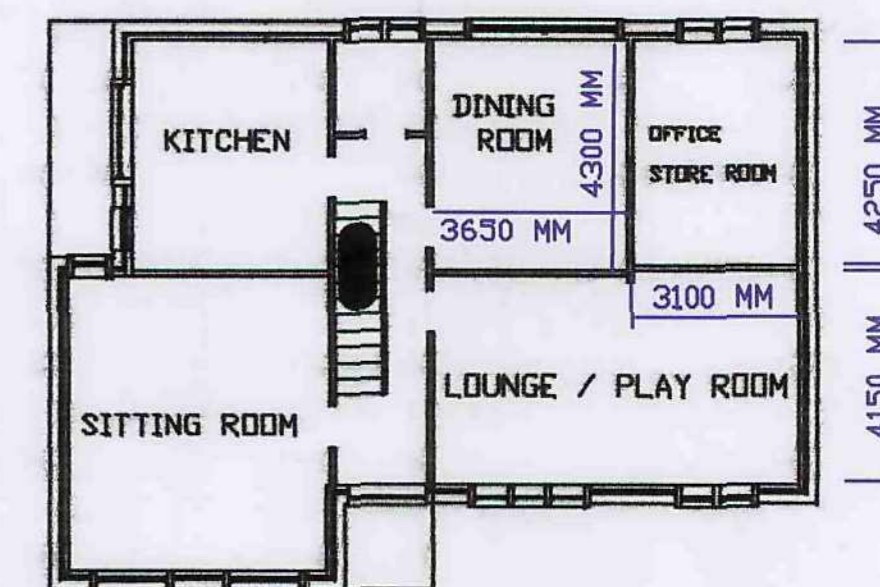

Front Elevation

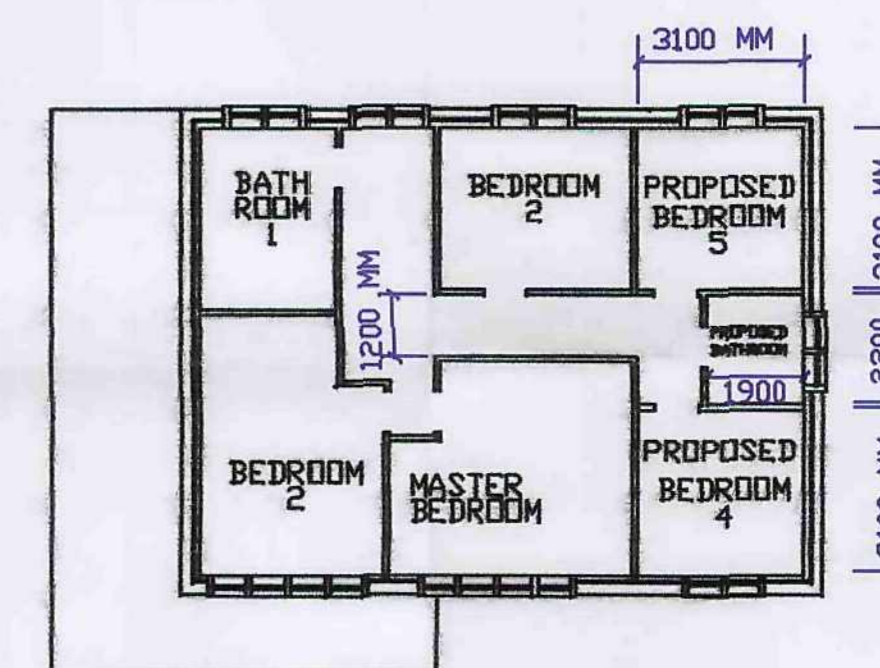

New first floor extension constructed over existing single storey section of building

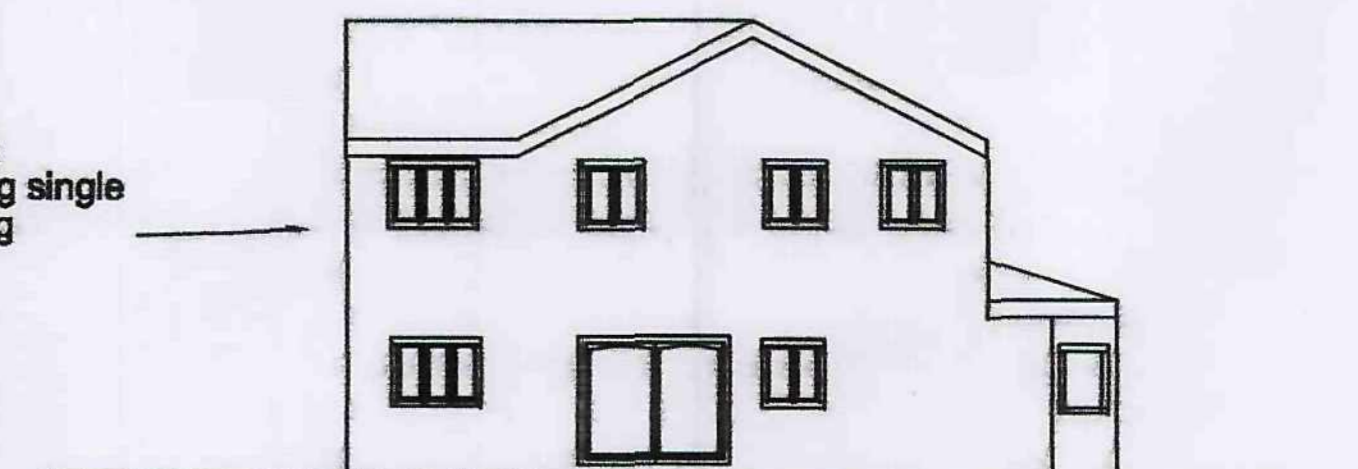

East Elevation

Ground Floor Plan

First Floor Plan

Rear Elevation

New first floor extension constructed over existing single storey section of building

Notes.

- 1) Extension to be built from same materials as existing building, i.e. natural stone. Where possible the stone from the existing single storey and end wall to be re-used.
- 2) Due to the length of the proposed passage way on the first floor natural light to be channelled into passage way by use of Natural light tubes such as Solatube.
- 3) Approximate Volume of extension is 59m³. Existing Building is 344m³ therefore house extension equates to 17% increase in size.

Proposed extension to

**64 Strafford Walk,
Dodworth
Barnsley
South Yorkshire
S75 3RB**
