Commercial Structures

24' Wide Polytunnel

The 24' structure uses a larger diameter tube than the previous two. It therefore creates a substantial framework at the useful size. The tube used is Z35 pre-galvanised steel with a 60.3mm diameter. It has a straight side of 1m which allows ample headroom at the sides.

The foundation tubes are from 1½" nominal bore galvanised tube which allows the hoops to be set and adjusted for tensioning the cover.

The end frames are tanalised timber, the main posts and lintel are from 3" x 3" cross section. As before, all fittings and fixtures are plated for protection against corrosion.

Price:

Length (7ft spacings)	Price Complete *
35ft	£693.05
42ft	£779.00
49ft	£851.80
56ft	£931.10
63ft	£994.26
70ft	£1,069.78
77ft	£1,144.80
84ft	£1,220.82
91ft	£1,303.10
98ft	£1,377.12
