Design and Access Statement

The polytunnel frame work is made of tubular steel. The cover is made from green woven polythene strands to form a net cover for shading plants. The door frames are made of wood. The vents and doors are made of wood framing and polycarbonate covers. The ground dimentions are 6.15m wide, 12.92m long and 3.7m to the ridge.

Access remains the same as to the rest of the nursery and has been the same for the last 25 years.

Regards
