- 2 Not less than five working days notice of the date of the proposed work shall be given in writing to the Local Planning Authority and the tree surgery shall be carried out to the standards set out in BS3998.
Reason: To ensure the work accords with good arboricultural practice.
- 3 Within the first planting season the three Oak trees, the Silver Birch tree and the Laburnum to be removed shall be replaced by three new Oak trees (*Quercus robur*) and two new Silver Birch trees (*Betula pendula*). Specification: Standard trees (stem diameter 10-12cm), shall be planted and affixed (with flexible tree ties) to a tanalised tree stake (minimum diameter 75mm) at a height of no more than 1m above ground level. In order to aid establishment a suitable mulch shall be applied (e.g. semi-composted woodchip to a minimum depth of 75mm) around the tree to a radius of 1m. The trees shall be watered immediately after planting then whenever required to ensure successful establishment. A root barrier or other engineered solution shall be installed at the time of planting to minimise the potential for further tree related subsidence as a result of the

two new trees. Within two weeks of planting, the Local Authority Tree Officer shall be informed and invited to inspect the new trees. The new trees shall be subjected to a Tree Preservation Order in replacement of the felled tree. Any tree which fails to become established within 5 years from planting shall be replaced with another tree of the same original specification.
