

Design & Access Statement for Notemachine ATM Installation.

Family Shopper Princess Theatre West Street Hoyland Barnsley S74 9DU

Introduction

This design and access statement has been produced in support for Planning Consent for NoteMachine ATM applications.

The purpose of the installation is to provide banking facilities for Family Shopper Princess Theatre West Street.

As this statement is for an A.T.M installation within the existing external façade, some aspects such as “layout” and “Access” are of limited applicability.

Design Principles and Concepts

Amount

The site is within a residential area which benefits from the provision of banking facilities.

The installed A.T.M provides direct and unobstructed access and has been positioned clear of the adjacent circulation route.

The A.T.M has been installed flush with the shop front glazing and cladding..

Scale

The dimensions of the proposal are:-

A.T.M and surround external dimensions 865mm x 1256mm set at a height of 700mm from the pavement level to the underside of the surround.

The display screen is carefully shielded from ambient lighting to prevent glare and reflection, ensuring a clear and sharp image is visual by both standing and seated users.

Layout

The A.T.M is installed at a suitable height in order that the cash dispenser can be easily accessed, in accordance with DDA regulations.

Landscaping

Due to the nature of the installation, we feel the application will not benefit from any future landscaping.

Appearance

The A.T.M is a modern design with a black bezel surround with white internally illuminated lettering Free Cash withdrawals out of the black background. The ATM has been installed through a secure white laminate panel constructed of a steel – ply – steel sandwich 11.4mm thick, which is a direct replacement for the original window frame infill panel.

Access

The A.T.M has good access for the public. Due to the flat level surface to the frontage and its position within the frontage.

Secondary Access

The installation has been designed to anticipate and overcome the restriction that would prevent disabled persons from making full use of the service to be provided together with the needs of more vulnerable people from protection of attack and intimidation. Providing an accessible and safe service for all.

Conclusion

The installed A.T.M has the principal benefit to the community of providing cash on demand to customers of Family Shopper Princess Theatre which also encourages people to visit benefiting and enhancing the local area.
