

## **Planning for 2 metre fence adjacent to footpath.**

Sam Fisher

I am requesting permission to move a 2m tall fence to the rear of my property to a position that backs onto a public footpath, there is currently fern/conifer trees standing at roughly 7 feet tall, these have been pruned to this height after moving to the property last January as they were left un maintained and overgrown roughly 25ft to 30ft in height, see attached picture, they were pruned due to the encroachment onto the footpath, this subsequently has killed the trees (not my intent) these trees served as privacy to the rear of my home as my house is built lower than the road, without a larger fence i would be left very open.

I am proposing to move an existing fence on my property forward (roughly 1m) once rotten trees are removed, this would not affect visibility to the road as the trees were at a much greater height and width.

Thanks

Sam
