

Planning statement.

This is a simple request to replace windows. The existing windows are not fit for purpose and would need work, double glazing panels are blown and locking handles worn out, wooden fixed pane windows are shoddy.

The windows were installed years ago, possibly before the property was listed, and do not fit in with a property of this age and type.

I think that the application is justified because of the improvement it will give to the property.

I have spoken with Tony Wiles who has advised that an application be made.

He did not appear to foresee any problem with the style and type of window that I would like to install.
