Subject: RE: Unit 5 Rockingham alternative lighting options

Good afternoon

I can confirm that we installed a 6.625kW PV system at Unit 5, Rockingham that will generate in excess of the kWh/m2 target set in the BRUKL output document and exceeds the kWp figure in the CRC report prepared by Award Energy.

Thanks

Phil

To: Shaun Pearson <ShaunPearson@j-f-finnegan.co.uk>
Subject: RE: Unit 5 Rockingham alternative lighting options

Thanks Shaun,

Whilst I'm thinking about Rockingham, I've got a couple of planning related points that need resolving. These are the relevant extracts from our planning consultant:

- **Condition 22 (Ground Work Investigations or Mitigation Work)** – **Rob Cole** to contact JF Finnegan and request a brief statement to confirm that the ground conditions encountered during construction were as expected according to the RSK reports.
- **Condition 4 (Low Energy Facilities Installation)** – **Rob Cole** to pull together supporting photographs of the PV installation and request a suitable letter from JFF confirming that the facilities have indeed been installed as per the CRC Report provided by Award Energy Consulting.

Could you send me the two statements when you get chance please? I'll take some photos of the PV installation today if I get time. We've almost got to the final discharge of conditions with Barnsley and I'd like to get these away as soon as possible.

Thanks,

Rob
