

2021/1517

Mr Miles Nixon

40 Pinfield Close, Great Houghton, Barnsley, S72 0BG

Erection of single storey side extension to dwelling

Site Description

The dwelling is a detached bungalow located in Great Houghton. Pinfield Close has a consistent street scene featuring other detached bungalows of similar design. The dwelling has a small front garden which extends to round to the side which features a detached outbuilding.

Proposed Development

The applicant is seeking approval for the erection of a single storey side extension. The extension will project 7 meters from the side (north east) elevation of the dwelling. The extension has a width of 8.02 meters. The extension will feature a pitched roof with a ridge height of 5 meters and an eaves height of 2.4 meters. The materials used will be matching brickwork and roof tiles.

Planning History

B/82/0395/HR – Erection of dwelling and substitution of house types for six dwellings (Historic)

B/85/0419/HR – Outline for residential development (Historic)

B/87/1463/HR – Outline for residential development (Historic)

B/88/1354/HR – Erection of four detached bungalows (Historic)

Policy Context

Planning decisions should be made in accordance with the current development plan policies unless material considerations indicate otherwise. The recently revised National Planning Policy Framework (NPPF) does not change the statutory status of the development plan as the starting point for decision making.

Local Plan Allocation – Urban Fabric

The Barnsley Local Plan (BLP) was adopted at the full Council meeting held 3rd January 2019. In addition, the Local Authority (LPA) has adopted a series of Supplementary Planning Documents (SPD), and Neighbourhood Plans which provide supporting guidance and specific local policies and are a material consideration in the decision-making process. In reference to this application, the following policies are relevant:

Policy SD1: Presumption in favour of Sustainable Development – States that proposals for development will be approved where there will be no significant adverse effect on the living conditions and residential amenity of existing and future residents. Development will be expected to be compatible with neighbouring land and will not significantly prejudice the current or future use of neighbouring land. Policy GD1 below will be applied to all development.

Policy GD1: General Development – States that proposals for development will be approved where there will be no significant adverse effect on the living conditions and residential amenity of existing and future residents. Development will be expected to be compatible with neighbouring land and will not significantly prejudice the current or future use of neighbouring land. Policy GD1 below will be applied to all development.

Policy D1: High quality design and place making – Supersedes Core Strategy Policy CSP 29 and sets out the overarching design principles for the borough. Policy D1 States that development is expected to be of high-quality design and will be expected to respect, take advantage of and reinforce the distinctive, local character and features of Barnsley.

Supplementary Planning Document: House extensions and Other Domestic Alterations

This document establishes the design principles that specifically apply to the consideration of planning applications for house extensions, roof alterations, outbuildings & other domestic alterations. The general principles are that proposals should;

- Be of a scale and design which harmonises with the existing building;
- Not adversely affect the amenity of neighbouring properties;
- Maintain the character of the street scene; and
- Not interfere with highway safety

The above principles are to reflect the revised principles in the NPPF, which promote high quality design and a good standard of amenity for all existing and future occupants of land and buildings.

National Planning Policy Framework

The NPPF sets out the Government's planning policies and how these are expected to be applied. The core of this is a presumption in favour of sustainable development. Proposals that align with the Local Plan should be approved unless material considerations indicate otherwise. In respect of this application, relevant policies include:

Section 12: Achieving well designed places - The Government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, creates better places in which to live and work and helps make development acceptable to communities. It is important to plan positively for the inclusion of high-quality design for all developments, including individual buildings, public and private spaces and wider area development schemes.

Within section 12, paragraph 134 states that *“development that is not well designed should be refused, especially where it fails to reflect local design policies and government guidance on design, taking into account any local design guidance and supplementary planning documents such as design guides and codes”*.

Consultations

Great Houghton Parish Council were consulted and raised no objections.

Representations

Neighbour notification letters were sent to surrounding properties, no comments were received.

Assessment

Principle of Development

The site falls within urban fabric as such, extensions to a domestic property are acceptable in principle provided that they remain subsidiary to the host dwelling, are of a scale and design which is appropriate to the host dwelling and are not detrimental to the amenity afforded to neighbours.

Extensions to residential properties are considered acceptable where they do not have a detrimental impact on the amenity of surrounding residents, visual amenity and highway safety.

Visual Amenity

The SPD states that *‘materials should normally be of the same type, colour and texture to the existing house or as close a match as possible’*. In this case, the proposed materials will be matching brickwork and roof tiles. The extension utilises a pitched roof which is akin to the existing dwellings pitched roof and aligned at the ridge and eaves. This is therefore an acceptable roof type.

The proposed extension conforms to the SPD in terms of its external materials and roof type, therefore it will have little impact upon the character of the street scene due to the harmony with the existing dwelling.

The proposed development is therefore not considered to be contrary to Local Plan Policy D1: High Quality Design and Place Making and is considered acceptable in terms of visual amenity.

Residential Amenity

The SPD states that single storey side extensions *“should not have an excessive sideways projection (i.e. more than two thirds the width of the original dwelling)”*. A projection of two thirds of the original dwelling would be 8.66 meters and the proposed projection is less than this at 7 meters.

The proposal will not have a significant detrimental impact on any neighbouring property by way of overshadowing or being overbearing as no dwelling is located to the side of the proposed extension. In terms of overlooking no window is proposed on the side elevation of the extension and the proposed windows on the front elevation don't increase overlooking from what is existing.

The proposal is considered to be in compliance with Local Plan Policy GD1: General Development and is acceptable in terms of residential amenity.

Highway Safety

There will be no impact upon highway safety. The proposal does not increase the number of bedrooms in the dwelling instead maintaining the three existing bedrooms. The dwelling doesn't currently provide two off-street parking spaces however as the number of bedrooms is not increasing there isn't a requirement to increase provision from that what is existing.

Recommendation

Approve with conditions
