The Hut, Wombwell. Parking Demand Statement

The Hut & proposed business will generate traffic to site and as a consequence parking demand.

We have undertaken a simple parking audit of our existing business in Mapplewell which is the same business model but on a smaller scale & concluded the following:-

- The maximum traffic generated at any one time is approximately 5 vehicles. This is generally when we hold a sewing class.
- During normal opening hours when we do not hold a sewing class maximum vehicle/parking demand is 3-4 per hour.

The business model at The Hut will be similar with the addition of a coffee shop, we therefore would suggest an increase of traffic/parking demand of 25%. This would increase demand at peak times to 7 vehicles and 5-6 at other times.
