Hi Craig,

No that was the only issue with the metric.

Kind regards,

Claire

Hi Claire,

Thank you for confirming the position with Isabel.

I'm just following up your comment:

"I am content with the proposed habitats within the landscape masterplan and feel that they are appropriate and achievable. My only comment would be that the traditional orchard should be located in the north western corner of the site away from Hemmingfield road and closer to the woodland on the sites northern boundary."

The landscape masterplan has been submitted as an illustrative plan. Our application is seeking outline planning permission and landscape remains a reserved matter. This would therefore be dealt with at the stage that an application for the approval of reserved matters is considered. On this basis, it isn't our intention to change the masterplan at this stage.

With that in mind, are you comfortable with everything now and able to confirm that you do not have any outstanding comments?

Many thanks for liaising with both myself and Isabel directly which is very much appreciated.

Kind regards,
Craig

Good morning Isabel,

Yes, I am happy with the approach you are suggesting in relation to strategic significance and there were not remaining issues with the metric.

I did request some of the mitigation be moved to other areas of the site and this could affect the metric figures.

Kind regards,

Claire

Hi Claire,

In regards to the metric related issues set out in your consultation response can I just check that you are referring to the strategic significance of the habitats within the metric?

Within the metric (attached) I assigned high strategic significance to other neutral grassland, bramble scrub, mixed scrub, traditional orchard, urban trees, and all hedgerow types as these habitats are listed as Local Priority Habitats in the Barnsley Biodiversity Action Plan which underpins the vision for the Dearne Valley Green Heart Improvement Area strategy.

I did not assign high strategic significance to cereal crops, vegetated garden, modified grassland and developed land sealed surface as these habitat types are of low ecological value and occur commonly throughout the local area.

Would it be your preference for me to update the strategic significance of these habitats to 'location ecologically desirable but not listed in local strategy' or are you happy with the current approach?

Also please can you confirm that there are no other metric related issues beyond this point?

Kind regards,

Isabel Syddall

Good morning Craig,

Please find attached my initial consultation response regarding this application - it was just some minor issues with the metric.

For info, 10% BNG is not required. However, BMBC do require all applications (prior to mandatory net gain) over 0.5 ha in size to ensure no net loss. This is documented within the validation checklist and the Biodiversity and Geodiversity SPD. I also covered this within the pre app for the site.

Kind regards,

Claire

Claire/Laura,

As a reminder, this application was validated prior to biodiversity net gain was introduced by statute. If you are referring to the BNG metric this application is therefore not affected by this.

We provided BNG information in any event to show that we are acting in a responsible manner and seeking to meet the requirements – but we are not required to.

Please confirm if you are referring to the BNG metric, or something else.

Many thanks.

Kind regards,
Craig

Hi Laura,

Thank you for passing this on.

Would you confirm what metric it is that you require an updated version of and why?

I've copied Claire in so that she can reply directly if she wishes to.

Many thanks.

Hi Laura,

I've not looked at this yet, but I do also need an updated version of the metric for review. Can you ask the applicants to send this over.

Thanks,

Claire

Hi Laura,

Further to our recent conversation, please find the additional ecological surveys report attached.

I would be grateful if you would pass this onto the consultee(s) as soon as possible and if you would acknowledge receipt.

Kind regards,

Craig
