Appendix 4

Yorkshire
Published 1892

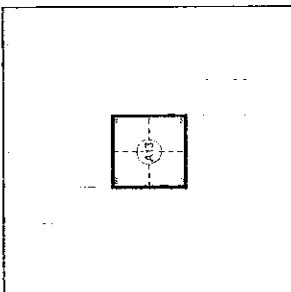

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1800s. In 1884 the 1:2,500 scale was adopted for mapping urban areas and by 1892 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published 1892 and 1893 editions of the Ordnance Survey maps of Yorkshire and the surrounding areas were based on the Cassini Projection, with inherent distortions of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

NOT TO SCALE

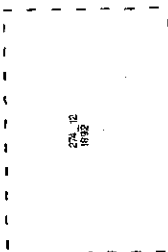

Yorkshire
Published 1892

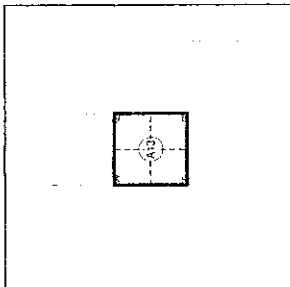

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1800's. In 1864 the 1:2,500 scale was adopted for mapping urban areas by the Ordnance Survey. The maps were compiled from the original maps of the Ordnance Survey. The published data is shown as the original data is shown on the original map. Before 1938 all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data Published 1993

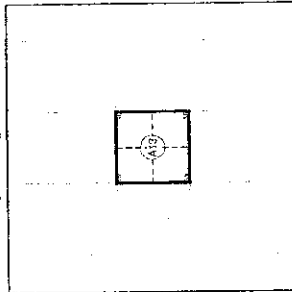

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SMI cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1992. These maps were the 'fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.
