Recorded Delivery

Dear Sirs

Re: Pre-application consultation for Prior Approval Determination under Part 24 of the Town and Country Planning GPDO 1995 (as 1999) in respect of Permitted Development by Telecommunications Code Systems Operators.

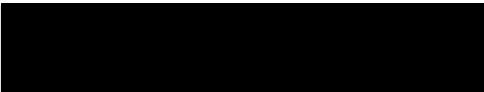

I refer to our previous pre-application consultation letter dated 26 January 2009, and I can confirm that my client intends to upgrade existing site 31037 on Doncaster Road Darfield Barnsley S73 9HD, by way of replacing the existing Flexicell and increasing the height of the Flexicell to 15m and adding 1No. Cabinet

We would be grateful if you could comment on the above-mentioned proposed locations and their suitability as telecommunications sites, so that an application for Prior Approval determination under Part 24 of the Town and Country Planning GPDO 1995 (as amended 1999), in respect of Permitted Development by Telecommunications Code Systems Operators, can be submitted.

As you may be aware telecommunications code systems operators, have now committed to the Traffic Light Rating system for public consultation whilst identifying potential sites for Base Stations. Therefore, it would be appreciated if you could provide the relevant rating for the above site.

If you require any further information concerning this pre-application consultation, either to discuss this letter further or to arrange a site meeting to tour the viable options please contact Nick Wallis at this office.

Yours faithfully

Nick Wallis
