

Sign Type V1 - Web address & Telephone number placement. Scale 1:20 @ A4

Typical Example

The telephone number and web address details should feature as White vinyl text and be located on the glazing, directly beneath the fascia at the opposite end of the fascia to the projecting sign. The vinyls should be fitted internally unless restricted by tinted windows or anti-blast film. The cap/number height should be 100mm for visibility and consistency for fascia and glazing areas.
