

Tree Works Summary

Following a visit to my property by Mr. E. Jowett, approximately 2 years ago, and recent discussions I enclose an application for tree works at my property.

There are a number of reasons for the request:

1. General management – over the 15 years during my occupancy of the property the trees and specifically conifers have grown considerably and in some cases to a point where their safety is now at risk. In recent years I have lost a number of precious trees including a Silver Birch during high winds. Additionally some of the trees at the boundary of the property have branches that reach into the main roadways and are at risk of being damaged by passing ‘high sided’ vehicles and *or of causing damage to individuals passing underneath.*
2. Light – Our property suffers from a lack of light and heat as a result of the large surrounding trees. The main lawned garden area within the property suffers, in periods of heavy rain the grass does not dry properly, roots from the trees are damaging the lawn. Additionally this is the main area we can use for drying laundry however this has become increasingly difficult to achieve in recent years.
3. Disease – Some of the trees, particularly the apple trees have suffered from canker and may need to be cut down, however I am open to advice/guidance.

As discussed with Mr Jowett, I am merely wanting to manage the trees effectively and not decimate the landscape. I have planted approx. 50 conifers at the top south elevation which I want to form a 10’ barrier however because of the surrounding trees they are struggling to get enough light and water.

I am happy to discuss proposals.

Regards

Michael Gill

Tree Schedule

T	1 Small Ash Tree	5'
T	2 Ash Tree	30'
T	3 Ash Tree	30'
T	4 Conifer	50'
T	5 Tree	30'
