

These are my comments on something that will destroy everything green and good between Pogmoor, Higham, Redbrook and Gawber and will affect my home, not least its value:

Loss of privacy

increased traffic

increased demand on services

loss of arable and grazing land

proposed density and style of housing

loss of public foot paths and bridleways

proposed timescale of the development because of its size

no recognition of the methane gas and water levels under this land

grubbing out of hedgerows with loss to wildlife.

the new link road might reduce traffic in Higham but will increase danger to children of Redbrook

Finally I would ask, is the amount of information and accessibility on the website designed to stop the lay person grasping its impact?

I smell collusion in everything that has gone before.
