Drawing 11 Ref:011

Figure 1

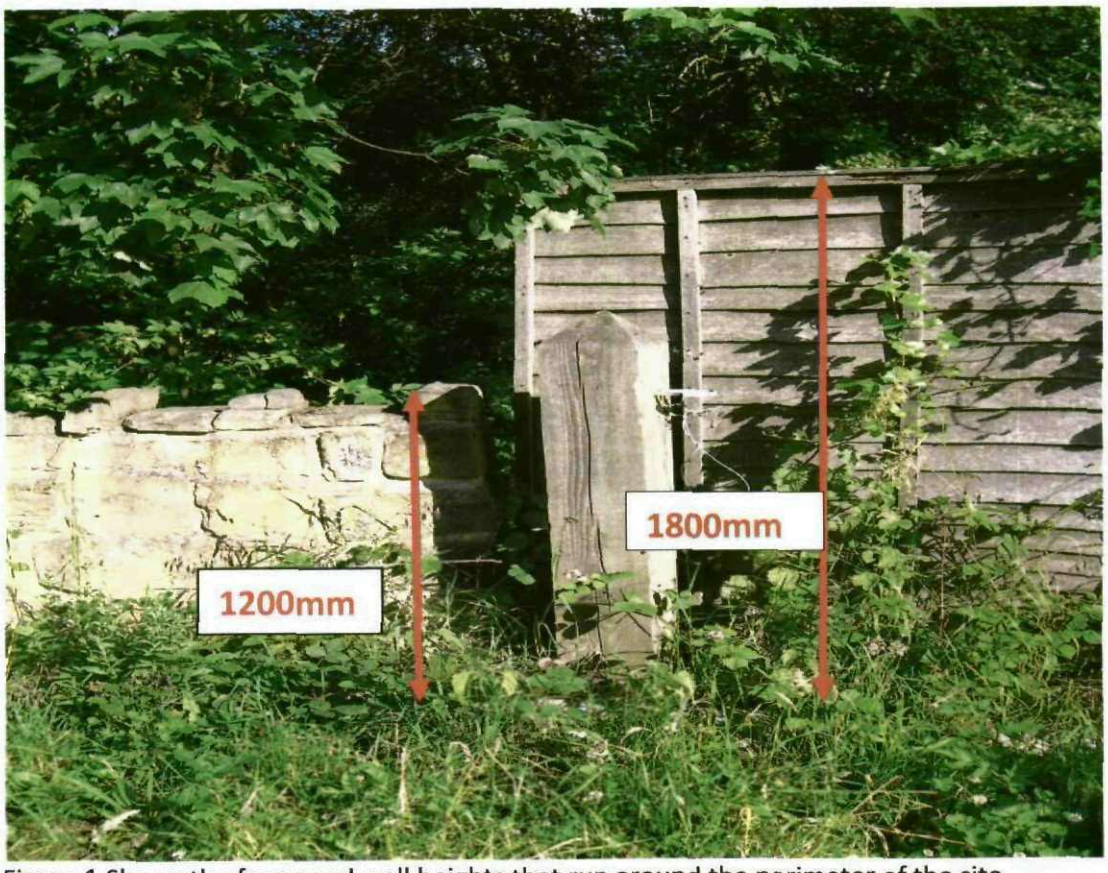

Figure 1 Shows the fence and wall heights that run around the perimeter of the site.

Figure 2

Figure two show the line of sight from the closest visitor point on the reserve to the proposed site. Given the size of the wall and the surrounding vegetation and the fact that the containers will be painted green to match the surroundings the containers do not represent a visible target.

Figure Three

Figure Three shows the same view point as Figure 2 magnified to enable detail to be shown.

The only current part of the in situ container visible is the top edge of the roof and a block of wood stored on top at this moment in time.
