Dear Alan (secretary)

Further to our meeting regarding golf balls entering our property. This is happening far too often now, causing serious damage. This has now escalated into a health and safety issue. Were at a stage now where even our children are frightened to play outside due to the amount of golf balls flying over.

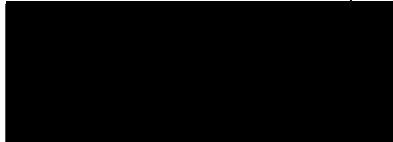

So after discussing it with yourself and the council it is in our opinion that a few changers are needed.

1. Net needs highering, we think at least the same again.
2. More popular trees need planting all the way to the wood.
3. Let the grass grow back so people can see there not aloud to hit balls in the area near our home.

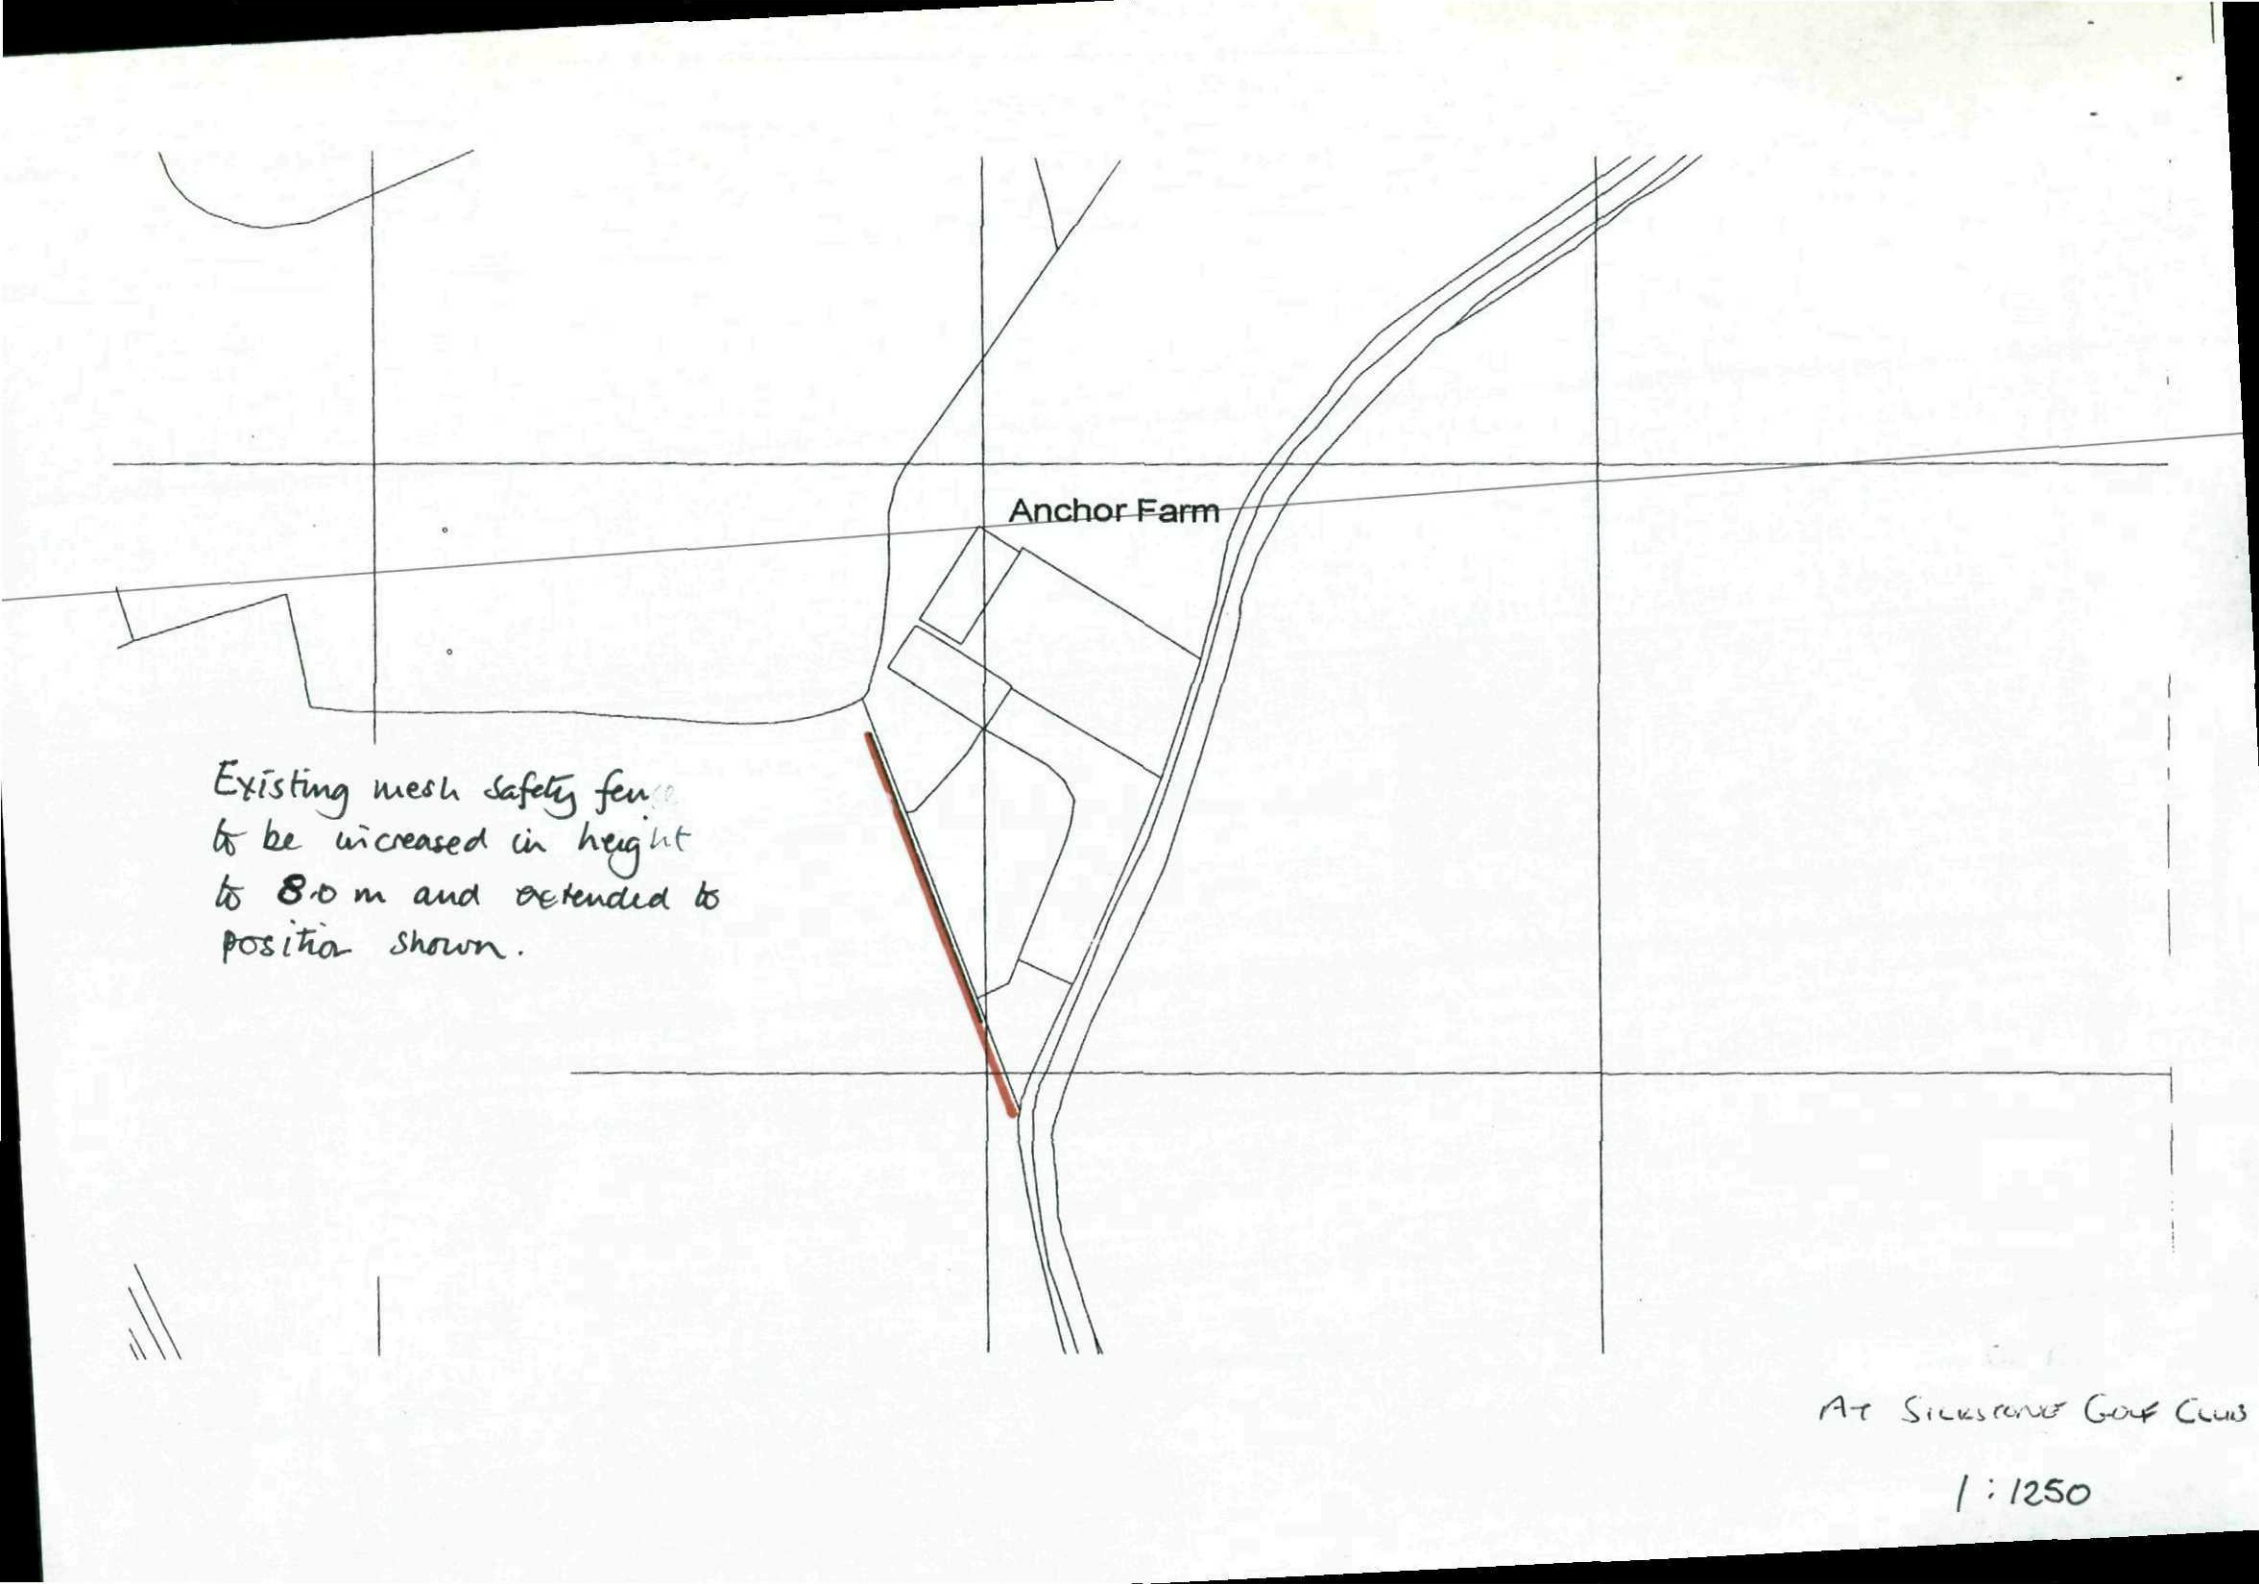

If you have any better idea s please let us no as you have more experience in these matters and understand exactly what's needed. We look forward to hearing a good and speedy outcome from all of this.

Many Thanks

Lee & Nicki Haywood
