Dear Mr & Mrs Watson,

Further to my visit this morning I confirm that I shall be reporting to the Trustees meeting on Tuesday to the effect that I recommend that you be given consent to fell the three trees, comprising one Oak and two Ash, one of which is diseased. I will also recommend that you be permitted to cut back the overhanging branches on a tree near you summerhouse and one overhanging the telephone wires. This is on the understanding that you will pay for the work and that you may keep the logs. If there are more logs than you require then my volunteers would be glad to collect them and they would be used to raise funds towards the future of the gardens. I note that you have spoken to Ed Jowett, the tree officer, and will get the consent of the Council before work commences.

The Tree Surgeon who has been doing voluntary work for the Trust is Becky Cottey; email Robandbex@gmail.com .

I confirm that the Trust is not in a position to sell the area of woodland at the present time but your enquiry will remain on file as a sale enquiry.

As regards the smell of sewage, the owners of the Strafford Arms have proposals to put in a larger septic tank which should improve the situation. They are currently in the process of obtaining the necessary consents.

Yours sincerely, John Lees.
