LANDSCAPE TREATMENTS

- TREE PLANTING**
Extensive planting of semi-mature trees, extra heavy standards and standards are proposed throughout the development to create a structure to the new housing which is in keeping with the scale and context of the development, breaking up the rooflines of the housing when viewed from a distance. Where practical there will be an emphasis of native species which are locally prevalent and trees will be procured and planted in accordance with BS5834:2014. Trees will be selected from the indicative list below.
- SHRUB PLANTING**
A mix of evergreen and deciduous shrub/climbing plants and herbaceous perennials will be planted throughout the site to give enclosure and structure to the development and all year round interest. Medium/large species will be planted against screen fences and walls where space permits and medium/low mixes will be planted into front gardens, mezz courts and around parking areas.
- ORNAMENTAL HEDGE PLANTING**
Direct hedges are proposed on the site frontage to define private realm. Lower growing evergreen hedging is proposed in situations where demarcation between public and private space is required without the need for tall enclosure. The evergreen hedges will be planted in various sizes according to species availability.
- GRASS TREATMENTS**
A variety of grass treatments are proposed throughout the site to define different areas of space and use. Front gardens will be turfed with a quality ornamental turf. Public areas on the site frontage will be seeded with a hard wearing amenity seed mix suitable for close mowing.
