No Agent details were submitted for this application

3. Description of the Proposal

Please describe the proposed development including any change of use:

We are applying to build a small field shelter in our field (of which we have full CPH number from DEFRA) which is adjacent to our garden, for our small flock of rare breed sheep (some of which are expecting lambs this Spring / April 2017). The shelter will be constructed of a framework, secured into the ground due to very strong winds experienced around here, with wooden planking facing. It will have twin barn style doors for access and 1 openable solid shutter on each side for ventilation, with a corrugated roof and 2 clear corrugated 'skylights' to provide natural light. Rain water will be collected off the rear of the shelter via guttering and down-pipe into water butts to provide natural drinking water for the sheep/plants. The field/sheep/shelter are not for any commercial use or financial gain but are simply a hobby for us. The positioning of the shelter would be in the most discreet and sheltered part of the field, with any views of the shelter from our distant neighbours and road being obscured by a combination of dry stone walling, grassy bank and multiple trees. The proposed sight is naturally slightly sloping from right to left when viewed from the front of the shelter, therefore we propose to level the ground in this area only to make full use of the shelter and lay flag stones for the welfare of the animals. We have already consulted our nearest neighbours about the field shelter and they are in favour in this going ahead.

Has the building, work or change of use already started? ○ Yes ◉ No
