PLANNING APPLICATION PP/00645592
PROPOSAL ; ERECTION OF NEW BARN
AT LEE LANE ROYSTON

DC [redacted]

Following consultation with planning officers, amendments have been made significantly in order to proceed with the above planning proposal.
The size of the barn has been reduced which is more proportionate to the size of the smallholding. Further considerations have been taken into account regarding a new location of the barn, which will now sit where the existing hay store is. The development of the barn will enable us to place the secure lock up inside, reducing the appearance of cluttered buildings. The hay store will be dismantled on completion of the barn .We feel the development of such a building will not have a visual impact ,in addition it will be in character will neighbouring agricultural buildings. The benefits to ourselves will be huge, it will provide a multipurpose area to house livestock and machinery all under one roof ,365 days a year ,dry and secure.
