

2019/0531—New Parking (VMS) Signs @ Barnsley Hospital NHS Trust

Sir/Madam,

Following review of the above referenced application and in light of the comments received from the Planning and Highways, we have revised our design proposal; taking on board feedback and comments raised from the initial submission, alongside consideration to our national design guidelines. We hope the below revised changes and explanation will be sufficient to reconsider this submission and progress this application. Please also refer to the attached Annex for the revised proposal:

NHS Hospital Building Note (HTM 65 Signs — Wayfinding) and NHS Hospital Building Note (HTM 07-03 NHS Car-parking Management)

We are mandated by the requirements set in the above documents to ensure the design and location of wayfinding signage across NHS site is effective and consistent in the dissemination of directional information to our patients, visitors and the public. Additionally, management of car parking facility need to be transparent for the users and clear signage is required to display the parking condition that operates on the site.

In light of the above and safety concern raised from the initial proposed submission, below are highlighted revised proposal for the location of the proposed Variable Message Signs (VMS) boards;

POGMOOR ROAD — SITE ENTRANCE A — VMS_POG_RD17

- There are currently 2no sign boards installed on the northeast approach to the hospital Entrance A (Staff and Visitors) via Pogmoor Road as shown on **Page 3**.
- We propose to remove 1no existing large sign as shown in inset on **Page 4**. and install the proposed VMS board
- The proposed VMS board will be installed as shown (Page 4) in clear view of the approach of Entrance A on Pogmoor Road.

POGMOOR ROAD — SITE ENTRANCE B1 — VMS_POG_RD18

- There are currently 2no sign boards installed on the southwest approach of Pogmoor Road to Entrance B1 (Car Park 2) (Visitors Car Park) via Pogmoor Road as shown on **Page 5**. Again information displayed are important to;
 - i. Assure oncoming vehicle of arrival at the hospital managed car park facility and
 - ii. payment tariff and terms of use that operate on the car park.

Revised Proposal:

- Relocate the tariff information sign downstream (see Page 7) such that it is sited adjacent to the existing pay station i.e. out of view of Pogmoor road.
- The proposed VMS board will be installed as shown (Page 6) in clear view of the approach of Entrance A on Pogmoor Road.

POGMOOR/GAWBER ROAD JUNCTION VMS_GAW_RD20

- There are currently 3no sign boards installed at the Gawber Road and Pogmoor Road intersection. While these display important information, we can understand safety concerns raised should an additional board i.e. VMS be erected in this location alongside all the existing sign boards.

Revised Proposal:

- Remove 1no signboard currently displaying the 'Barnsley Hospital Charity' information (see page 8)
- Install 1no proposed VMS board as shown on page 9.

Barnsley Hospital Site Car-parking Layout Plan: Please refer to Annex document

POGMOOR ROAD — ENTRANCE A — VMS_POG_RD17

PROPOSED

Revised Proposal:

- Remove existing 1no signage as shown in inset.
- Install proposed VMS Board as shown

POGMOOR ROAD — ENTRANCE B1 — VMS_POG_RD18
