

KEY:

- NEW TOPSOIL AND GRASS TURF
- NEW TARMAC CONSTRUCTION
- NEW PAVING SLAB CONSTRUCTION
- NEW BLOCK PAVING CONSTRUCTION
- EXISTING LEVELS
- NEW LEVELS

NOTES:

- DO NOT scale from this drawing.
- All dimensions to be checked on site by the contractor prior to any construction on site.
- The positions of existing drainage routes/accessories shown on this drawing are indicative only and are not to be relied upon. The contractor is to carry out his own investigations and mark up the positions of all existing drainage routes/accessories on the site and notify John Hill Associates Ltd prior to undertaking any external works.
- Bad and surround all new and existing drain runs in concrete where passing under the building.
- Backfill along the lines of new drain runs, and where existing drain runs removed with 150mm dry well consolidated hardcore to underside of new or existing surface construction (as identified on site plan).
- All new below ground drainage to be 100mm Ø Hardy Quantum uPVC pipework laid to falls (1:40 for Foul Water, and 1:80 for Surface Water).
- Supply and install new Polypropylene Inspection Chambers to positions indicated, from Harworth (Weyn), with recessed access covers from Steepley Brickhouse suitable for F400 class A4 loadings.
- All new SVPs to have above ground rodding access plates, and to terminate with wire cage min 900mm above any window within 3m.
- New soakaways to be ACO StormBlox type, positioned min 5m away from any building. The contractor is to allow for carrying out percolation tests as required, for design of appropriate sized soakaways in each location by ACO, and for making good to lawn with topsoil and turf.

- NEW SURFACE WATER DRAINAGE
- NEW FOUL WATER DRAINAGE
