

Key

-  New Turbine
-  Former Turbine
-  Listed Building

This ZTV was calculated for the proposed turbine's blade tip. The existing turbine has a diameter of 9.5m with a height of 19.75m. The proposed turbine has a rotor diameter of 6.9m and a total height of 18.495m. The viewer height used for the ZTV is based on a bare ground case scenario i.e. no screening effects by buildings. The ZTV takes into account atmospheric refraction.
