

Darley Cliff Hall Rear Garden Application For Tree Works

I Paul Robinson of Bestall & Co Landscape Design acting as technical advisor would like to apply for tree removal on behalf of my client Mark Ludlam, Darley Cliffe Hall, Wosborough Barnsley, S70 4AG.

The necessary work to the tree's will be carried out by – TBC

Locations of trees

There are three tree's that we would like to remove from the rear garden (please see associated drawing) Tree 1 and 2 sit well withing the boundary of the rear garden and tree 3 is located on the eastern boundary of the property but still withing the clients land.

Tree Ownership

My client Mark Ludlam is the owner of the trees stated.

What are we applying for?

We would like to apply for the removal of the 3 trees listed below:

T1 Holly

T2 Cherry

T3 Pine

Reasons for removal

T1 Holly – This tree is in poor health and offers no visual merit to the existing garden and new proposed scheme:

Description of tree work required – **Complete removal**

T2 Cherry – Like the holly tree the cherry also appears to be in poor health and from appearance due to age seems to be coming to the end of its life. Due to its unhealthy appearance this tree also offers no visual merit to the existing of proposed garden.

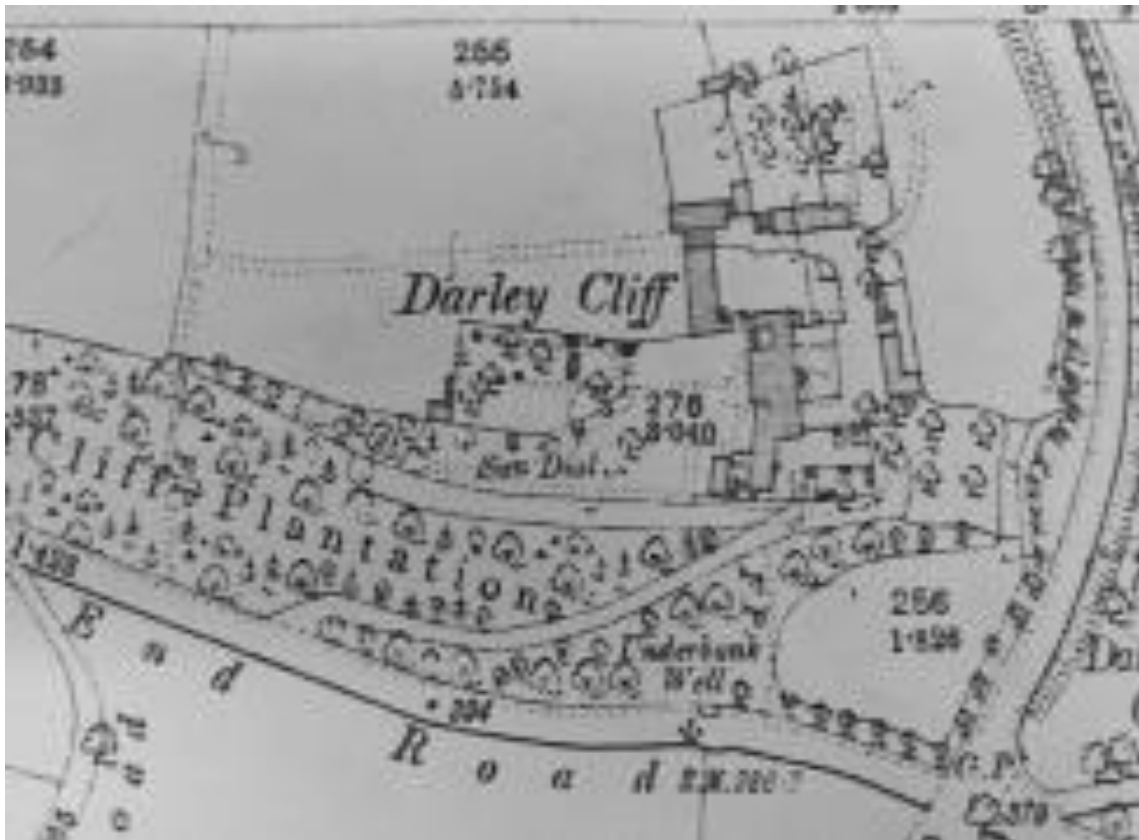

Description of tree work required – **Complete removal**

T3 Pine – The pine tree is currently growing in very close proximity/through the existing oak tree this has likely a self-seeded specimen. We would like to remove this to preserve the health of the oak tree before any damaged is cause to this specimen.

Description of tree work required – **Complete removal**

Planting replacement tree's

For the 3 tree's we would like to remove we proposed planting 10 new native deciduous trees within the garden (please see supporting drawing for new tree locations) These new tree's will be planted in recognition to restore the plantation walk shown on early maps of the garden (see below 1890's map showing tree in south west of garden)
