

PLANNING CONSULTATION RESPONSE

Application No	2025/0865 & 2025/0866
Proposal	The installation of 1no. BT Street Hub and removal of associated BT payphones. (Planning Consent) & (Advertisement Consent)
Address	Pavement o/s 46 High Street, Wombwell, Barnsley, S73 8BH
Date of Consultation Reply	13/11/2025
Consultee	Nik King, Senior Urban Design Officer

Consultation Assessment and Justification

I have no objection to these two applications so long as the seven suggested planning conditions contained in the applicant's Planning, Design and Access Statement, (contained towards the back end of the statement), are imposed.

The first two, (listed as 'a' & 'b'), are particularly important to me- we need any paving re-instated to match that of the adjacent paving, both for the removal of any features and in the installation the new BT street hub.

There should be no tarmac or concrete used as surfacing following the removal of any features or around the BT new street hub- for the latter the matching paving needs to be specifically cut ***right to the edge of the base of the hub.***

NO OBJECTION*

Consultation Suggested Conditions:

I suggest that the seven planning conditions contained in the applicant's Planning, Design and Access Statement, (contained towards the back end of the statement), are imposed.
