APPLICATION FOR PLANNING PERMISSION FOR A NEW BUILDING FOR TRAINING PURPOSES

DESIGN AND ACCESS STATEMENT

The purpose of the new building is to carry out training to contractors within the sewer and drainage industry. The building is designed to provide a sheltered environment while practical training is in progress.

Contractors will be trained in the safe and correct installation procedures and techniques, which will eliminate any risk or liability to companies for whom they work. By having a well-structured, clear and concise non rushed training programme the objective is to achieve a high percentage pass rate by the attending candidates.

There would be on average an additional ten people per month coming onto the site. This would not affect parking on the site at all.

The building will be in keeping with the existing building.

No trees, plants, shrubs will be effected as the existing land is not being used for anything and is currently a wasted area. The new building will enhance the look of the area.
