

My client Natalie brown has called my company in to have a look at her Dying Ash tree at :  
Number 2 Ash green gardens, S36 9AD

I have investigated this and I deem this tree to be unsafe and in need of emergency extraction.

Photo evidence shows that this tree is suffering from:

.Significant lean towards road and public pathways

.Decay in limbs

.Decay throughout tree

.Rotten bark

.Fungus growing inside canopy

Please view photos attached to application for evidence.

Tree survey completed by James Austin at Huddersfield Arborists Ltd
