| <b>Consultee</b>                  | Edward Jowett (Tree Officer)                                                                                        |

### Consultation Assessment and Justification

The Mulberry subject to this application is located in a prominent location and as such has significant amenity value.

The works proposed are to tidy up poor previous work which has been undertaken to the tree as well as to prune back branches touching the building as per the works description. The works proposed are sensible and proportionate and will be of benefit to both the tree and the resident. As such there is no objection to what is proposed from an arboricultural perspective.

**Note:** Assessments of tree condition and safety are based on a simple visual inspection from ground level. Comments should not be taken as a definitive assessment of tree health, as this should be carried out by a suitably qualified arboriculturist, possibly including a high level inspection. The applicant should be reminded of the owner's legal responsibilities to ensure that trees are regularly inspected and maintained in a safe condition.

**NO OBJECTION\***
