PA Ref: 2013/0892

Doc 1.1: Field Shelter and Storage Spec

Field shelter and tack room made from 4 x 2cls framing

Exterior Walls: Cladded with 12mm feather edge 5 x 3 which has a natural green colour to it.

Foundations: Sitting on timber skids, staying on the hardcore area as outlined in Diagram 2.1 Outline Plan.

Gates: two galvanised gates will be on the front elevation.
Door to storage area made from the same materials as the walls and finished with aluminium fixings.

Roofing: Black corrugate bitumen
Guttering on rear elevation and down pipe to side elevation, which which will feed a water butt.

Maintenance

To protect the shelter and keep it looking nice, we will stain / treat the wood in a dark brown colour, and maintain this when needed.
