Design and Access Statement for

The Installation of Palisade Fencing at Regent Street Hoyland, Barnsley

Background

Regent Street allotments are owned and managed by Barnsley MBC. The allotments are leased out to members of the public to grow vegetables and fruit. However in recent years this allotment site has been subject to vandalism and theft.

Groundwork Deame Valley is working in partnership with BMBC on a project to improve alloments sites across the borough. Regent Street is the fifth site to be improved. Work will include installing a palisade green powder coated fencing/gate to a hieght of 1.8m to secure the site entrance. The fencing will be a "W" profile with rounded notched tops and the gate will be a double leaf and installed by contractors who will dig holes by hand and secure the fence posts in place with cement. Any access tracks onto the allotment will remain accessible.

(Please see the enclosed map).

Any machinery needed for the work will be stoted in a secure container or taken back to a secure deppo, and where possible any materials/waste taken off site will be recylced.

Prior to any work taking place a consultation event will be held by Groundwork Deame Valley so that local residents and land owners can voice there opinion and views about the proposed work.
