Planning Application for Temporary Car Park at Company Shop, New Road, Tankersley, Barnsley, S75 3BQ

Briefing note:

Please also refer to previous planning approval 2009/0498 regarding the same issue.

Company Shop has utilised this temporary car park for its own staff use since March 2009. In June 2009, the above planning application was retrospectively approved subject to satisfactory landscaping being carried out and the temporary nature of the approval until 1 June 2010.

Company Shop has occupied its site at New Road Tankersley since 1985, and its business growth within the site has been the subject of many discussions with the local Planning Authority. It is Company Shop's intention to relocate its business premises to new purpose built premises on Wentworth Industrial Estate. Discussions regarding this relocation are ongoing, the most recent being a pre-application discussion with Steven Kirkham. James Hyde, is also aware of the existing site and the temporary car park as he recently visited the site to inspect the landscaping works.

Company Shop depends upon its usage of this additional car parking area to address both traffic volume and safety issues on its site.

The following photographs were taken on 10 August 2010 to show the temporary car park as it is used.
