Planning statement for the variation of conditions on application 2024/380 conditions 2 & 4.

We would like to amend the conditions that were originally imposed for planning permission 2022/0555 and later discharged on planning permission 2023/0039.

There were then applied for a variation of the conditions on application 2024/380 which was to move the lift position and change the materials the lift was clad in (condition 2) . We also asked for the opening hours to be rectified as these has changed back to the original opening hours approved and not the ones that we had varied on planning application 2022/1153. Everything was approved however the materials for the lift shaft remained in brick.

This new application is for the lift shaft material to be changed to stainless steel and glass. This statement is to avoid any confusion as to the materials that are to be used. The extension will still be in the brick type previously approved Forterra Cotswold London. The lift shaft externally will be in stainless steel with glass doors internally on the first floor and stainless steel doors externally on the ground floor. Hopefully this statement will now clarify what we are after. There is a document submitted with the application from the lift manufacturer which will make things much clearer.
