Yorkshire

Published 1854 - 1855

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas; these maps were used to update the 1:10,560 maps. The published date given therefore is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. From 1940 to 1949, a Provisional Edition was produced, which updated the 1:10,560 maps with new survey data. The maps appear to be a combination of the 1:10,560 maps and the Provisional Edition. The first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Ordnance Survey Plan Published 1955 - 1956

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the Ordnance Survey archives. The first maps for mapping urban areas were the 1:2,500 scale maps published in 1840. The published date given therefore is often some years later than the survey date. Before 1935, all OS maps were based on the Cassini Projection, with subsequent editions of a single county or group of counties, giving rise to significant inaccuracies, which were corrected in the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Ordnance Survey Plan

Published 1970 - 1971

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at a scale of 1:2,500 adopted for England, Wales and Scotland in the 1840's. In 1854 the OS adopted a new scale of 1:2,500 for mapping urban areas and by 1896 it covered the whole of what is now Great Britain. The published data given below is often several years from the surveyed date. Before 1939, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordnance Survey Plan Published 1980 - 1984

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas, the maps were used to update the 1:10,000 maps. The published data given here were often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These are initially overlaid with the National Grid. In 1970, the first revision process was produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

**Ordnance Survey Plan
Published 1982**

Source map scale - 1:1,250

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1940's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1898 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published data given below is often some years later than the projected data. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Ordnance Survey Plan Published 1989

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the scale of 1:10,000 in England, Wales and Scotland in the 1940's. In 1954 the 1:10,000 scale was adopted for the majority of urban areas, these maps were used to update the 1:10,000 maps. The Ordnance Survey maps are often some years later than the surveyed data. Before 1939 OS maps were based on the Cassini Projection, with independent surveys of individual areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

**Large-Scale National Grid Data
Published 1993**

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the forerunners of digital mapping and so provide detailed information on inlets and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

10k Raster Mapping Published 2000

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which is the old 1:10,000 maps originally published in 1970. The data is highly detailed and includes buildings, fences and field boundaries as well as all roads, tracks and paths. The maps are also included together with the relevant road number and classification. The map data is a very information depiction includes county, unitary authority, district, civil parish and constituency.

10k Raster Mapping Published 2006

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 road raster mapping. These maps are derived from Landplan which replaced the 1:10,000 maps originally published in 1970. The data is highly detailed showing built up areas, roads, fences and field boundaries as well as all roads, tracks and paths. Road names are included together with the relevant road number and classification. Boundaries for various regions include county, unitary authority, district, civil parish and constituency.
