Peter

A diversion as shown is definitely a possibility. I imagine it would be via a minor sewer exchange of letters agreement application that you can find the application form on our website.

Kind regards

Rob

EXTERNAL SOURCE - THINK BEFORE YOU CLICK

Good morning Robert.

It is a while since we last spoke and at that time it was in connection with the 'build over agreement' in respect of a dwelling on the above site.

I believe the build over agreement reference was GB/YWS121/37.

A possibility has arisen to build a further dwelling on the site (subject to planning approval) and I wondered if at this stage I could just run something by you to determine in principle if what I am suggesting may be acceptable to YW ?

It appears to me that if we were to divert the existing combined sewer which crosses the site, this would create the necessary space to locate an additional dwelling.

You will see on the attached drawing that I would propose diverting the drain from just after the build over to plot 'A', along the route shown in blue before re-connecting back into the original drain run prior to the boundary with the treatment works.

At this stage Robert, I'm just trying to determine if this is a possibility ?

I thank you in advance for any time you are able to give to this initial enquiry.

Kind regards.

Peter
