6TH DEC
Whilst I accept that an external fire escape would provide a necessary means of escape from a Building Control perspective I do not think that it could be supported by planning. The property occupies a prominent corner position within an attractive Victorian residential street. The inclusion of the stair case would be an undesirable addition which would detract from the setting of the property and the general appearance of the street scene. The matter could also potentially raise amenity issues to neighbouring properties due to the perceived increase in overlooking.
I would therefore suggest that you do not progress with a planning application and that you seek reinstate an internal staircase that meets with Building Control approval. I should also think that this may present some cost benefits not only from avoiding any planning fees but also from that saved from what would otherwise be spent on the steelwork fabrication.
Please note that these comments are given without prejudice.
2ND JAN:I take it from those comments that this would be a retrospective application then? As I've said the works would appear to be very minor, my only comments is that the appearance of the bay would be unbalanced. I note that it is a 3 pane window, I think a better appearance could be achieved by including the opening in a more central location with a window pane either side.
2ND JAN
Its not going to win any awards, are those steps leading up to the doorway? It also leaves a rather bizarre internal arrangement. Also what's the situation with the first floor? I was under the impression that the residential use was completely separate to the retail element and therefore formed a private unit. If this is the case then a change of use maybe required.
3RD JAN:
A change of use application stands at £385 this can cover the associated external alterations as well. Normally a D&A would not be required for change of use but it will be required in this instance to cover the alterations being proposed to the bay window
