1 Introduction

- 1.1.1.1 This report presents the results of a Preliminary Ecological Appraisal and Feasibility Biodiversity Net Gain Assessment undertaken at Nu-Well Shopping Mall, Hough Lane, Wombwell, Barnsley, S73 0DR in relation to the proposed mixed development¹.
- 1.1.1.2 Nu-Well Shopping Mall is located at OS grid reference SE39920283 at an altitude of 63 m above sea level (refer to Figure 1). The study area extends to 1,810.2 sqm; hereafter referred to as the Site. The Site is located within an urban setting within the central region of the town of Wombwell, with Summer Street to the east and Hough Lane to the south.
- 1.1.1.3 The aims of this assessment were to identify the habitat types present on the Site, to assess the potential for protected / notable species to occur and to make any recommendations for further surveys or assessments which may be required to inform a proposed development at the Site. This report includes the findings of a desk-based study and daytime Site visits undertaken on 19th September 2024 and 13th January 2025 by Thomas McQuillan MCIEEM².
- 1.1.1.4 This document presents a Feasibility Biodiversity Net Gain (BNG) Assessment. In accordance with DEFRA guidelines³, the DEFRA Biodiversity Statutory Small Sites Metric 4.0⁴ has been used to calculate the baseline value of the Site (before development) and indicative values for the post-development habitat features in order to calculate the indicative Total Net Unit Change.

Figure 1. Approximate Site location shown by red outline (aerial imagery dated 2023)⁵.

¹ Refer to Appendix 3 for Existing and Proposed Plans.

² MCIEEM – Full member of the Chartered Institute of Ecology and Environmental Management.

³ DEFRA. The Small Sites Metric (Statutory Biodiversity Metric 4.0) - User Guide. Date: February 2024 (Updated July 2024).

⁴ <https://www.gov.uk/government/publications/statutory-biodiversity-metric-tools-and-guides>

⁵ Refer to the Existing Site Plan in Appendix 3 for exact Site boundary.

2 Methodology

2.1 Desktop Study

2.1.1.1 Barnsley Biological Records Centre (BBRC) was contacted for searches of protected sites and records of protected species within a 1 km radius of the Site. In addition, the following data sources were searched for statutorily protected sites and additional ecological data of relevance to the assessment such as off-site waterbodies:

- Multi Agency Geographic Information for the Countryside (MAGIC).
- Ordnance Survey 1:10,000 mapping, Aerial Imagery (dated 2002 - 2023) and QGIS 3.16.

2.2 Personnel

2.2.1.1 The Preliminary Ecological Appraisal and Biodiversity Net Gain Assessment was undertaken by Thomas McQuillan who is a full member of the Chartered Institute of Ecology and Environmental Management (CIEEM), holds Natural England survey licences for bats⁶ and Great Crested Newts⁷, is an Accredited Consultant⁸ on the Natural England Earned Recognition scheme, and has over 15 years' experience of ecological consultancy.

2.3 Preliminary Ecological Appraisal

2.3.1.1 A Preliminary Ecological Appraisal of the Site was conducted on 19th September 2024 in accordance with the standard survey methodology⁹. The habitats on the Site were assessed and categorised in order to provide baseline information and subsequent interpretation of the ecological value of the Site. In addition, the Site was searched for evidence of protected / notable species and assessed in terms of its potential to support protected / notable species such as Badger, Great Crested Newt, Water Vole, reptiles and bat species.

2.3.1.2 A Preliminary Roost Assessment was undertaken on the buildings within the Site; the external building inspection was completed on 19th September 2024 with the internal building inspection completed on 13th January 2025. This involved searching the buildings for signs of bats such as droppings and for potential bat roost locations. The survey was undertaken in accordance with current good practice guidelines^{10 11} and included an external and internal assessment of the buildings. Each building proposed for development was assessed in terms of its potential to support bat roosts using the following categories:

- Negligible potential.
- Low potential.
- Moderate potential.
- High potential.
- Confirmed roost.

2.3.1.3 Any trees within or edging the Site would be inspected from ground level for evidence of bats and for potential bat roost features, using close-focussing binoculars.

⁶ Natural England Class Licence Registration No. 2015-11312-CLS-CLS - CL18 Level 2 (Bats).

⁷ Natural England Class Licence Registration No. WML- CL09 & A29 Ref. 2023-66432-SC-SCI (Great Crested Newts).

⁸ Natural England Earned Recognition Accredited Consultant Ref. BER0116.

¹¹ Bat Survey Requirements, Minimum Standards in North Yorkshire Version 1; North Yorkshire Bat Group; 12/11/2013

2.4 *Biodiversity Net Gain Assessment*

- 2.4.1.1 To inform the Biodiversity Net Gain Calculations, the habitat types and condition of the habitats within the Site were assessed during the Site visit in accordance with the standard methodology^{3 12}. The habitats on the Site were assessed and categorised in order to provide baseline information and subsequent interpretation of the ecological value of the Site.
- 2.4.1.2 The latest version of the DEFRA Biodiversity Statutory Small Sites Metric¹³ has been used to calculate the baseline value of the Site (before development) and the post-development value in order to calculate the Total Net Unit Change.

2.5 *Limitations*

- 2.5.1.1 The Site survey was undertaken within the optimum season for habitat surveys (April to September inclusive¹⁴).
- 2.5.1.2 The external Preliminary Roost Assessment was undertaken within the summer period when bats are most active (May to September) with the internal inspection completed outside of this period. This was not considered to be a significant constraint as bat droppings can be prevalent long after bats have left a roost or entered hibernation, particularly inside a building.
- 2.5.1.3 Due to the presence of false ceilings within the building there was no access to the loft voids. Whilst the inclusion of a loft inspection is preferable as part of a Preliminary Roost Assessment based on the building holding features of Low Bat Roost Potential and with a dusk emergence survey undertaken on the building in September 2024 this was not considered to be a significant survey constraint and can be mitigated with standard measures during construction.
- 2.5.1.4 There were no access restrictions. Overall, there were no significant limitations.

¹³ <https://www.gov.uk/government/publications/statutory-biodiversity-metric-tools-and-guides>

¹⁴ As detailed within Section 3.1 of the 3.10 BNG User Guide.

3 Results

3.1 Desktop Study

3.1.1.1 Information provided by Barnsley Biological Records Centre (BBRC) is reproduced in Appendix 3 with key information summarised below.

3.1.2 Internationally & Nationally Protected Sites

3.1.2.1 Unit 9 of Dearne Valley Wetlands Site of Special Scientific Interest (SSSI) is located 550 m to the east of the Site. Units 8, 10, 11 12, and 20 of Dearne Valley Wetlands Site of Special Scientific Interest (SSSI) are located within 2 km of the Site.

3.1.2.2 The Site is located within the Impact Risk Zone for Dearne Valley Wetlands Site of Special Scientific Interest (SSSI) however, the proposed development at the Site would not meet the criteria whereby the Local Planning Authority should consult Natural England.

3.1.3 Locally Designated Sites

3.1.3.1 Barnsley Biological Records Centre (BBRC) confirmed that there are no Local Wildlife Sites or Aol's within 1 km of the Site.

3.1.4 Priority Habitats

3.1.4.1 Several polygons of UK Priority Habitat are scattered throughout the 2 km search area; these include Coastal and Floodplain Grazing Marsh and Deciduous Woodland. The nearest parcel of UK Priority Habitat is an area of Deciduous Woodland 304 m to the east of the Site.

3.1.4.2 Several parcels of Ancient & Semi-natural Woodland and of Ancient Replanted Woodland are located within 2 km of the Site; these are all > 1 km from the Site to the north of the Dearne Valley Parkway.

3.1.5 Species Records

3.1.5.1 Please note the paucity of records for certain areas may be attributed to lack of survey and recording input rather than a limited number of species within an area.

Birds

3.1.5.2 BBRC provided records of the following bird species within 1 km of the Site; Barn Owl, Black Swan, Black Bird, Blackcap, Black-headed Gull, Blue Tit, Bullfinch, Canada Goose, Carrion Crow, Chaffinch, Chiffchaff, Coal Tit, Collared Dove, Common Gull, Common Redpoll, Common Tern, Coot, Cormorant, Crane, Cuckoo, Dunnock, Fieldfare, Gadwall, Garden Warbler, Goldcrest, Golden Plover, Goldfinch, Grasshopper Warbler, Great Crested Grebe, Great Spotted Woodpecker, Great Tit, Green Woodpecker, Greenfinch, Grey Heron, Grey Partridge, Grey Wagtail, Greylag Goose, Herring Gull, Hobby, House Martin, House Sparrow, Jack Snipe, Jackdaw, Jay, Kestrel, Kingfisher, Lapwing, Lesser Black-backed Gull, Lesser Redpoll, Lesser Whitethroat, Linnet, Little Grebe, Little owl, Long-tailed Tit, Magpie, Mallard, Meadow Pipit, Merlin, Mistle Thrush, Mute Swan, Nuthatch, Osprey, Oystercatcher, Pheasant, Pied Wagtail, Pink-footed Goose, Pintail, Pochard, Red-legged Partridge, Redshank, Redstart, Redwing, Reed Bunting, Reed Warbler, Robin, Rock Dove, Rook, Ruddy Duck, Sand Martin, Sedge Warbler, Short-eared Owl, Shoveler, Siskin, Skylark, Snipe, Song Thrush, Sparrowhawk, Starling, Spotted Flycatcher, Stock Dove, Stonechat, Swallow, Swift, Tawny Owl, Teal, Treecreeper, Tufted Duck, Water Rail, Waxwing, Whitethroat, Wigeon, Willow Tit, Willow Warbler, Woodpigeon, Wren, Yellow Wagtail and Yellowhammer.

- 3.1.5.3 None of the records were for the Site. Several of the species recorded within 1 km of the Site are listed on the Amber and Red List of Birds of Conservation Concern¹⁵.

Amphibians & Reptiles

- 3.1.5.4 BBRC provided records of Great Crested Newts (two records), Common Frog (seven records), Smooth Newt (one record) and Common Toad (19 records) within 1 km of the Site.
- 3.1.5.5 The two Great Crested Newt records provided by BBRC were for Wombwell Golf Course Pond > 0.8 km to the south-west of the Site at SE395021 (dated 23/06/1991).
- 3.1.5.6 There are no Great Crested Newt Class Licence Returns, Great Crested Newt 'positive' results from the Great Crested Newt Pond Surveys (2017-2019) or Granted European Protected Species Application for Great Crested Newt within 2 km of the Site.
- 3.1.5.7 Six records of Grass Snake were provided within 1 km of the Site. These were dated 2005 – 2016. Records were for Park Hill Brick Pits Local Wildlife Site (>0.7 km to the east) and the Former Wombwell Foundry Site 1 km to the south-west of the Site.

Bats

- 3.1.5.8 BBRC supplied 35 records within the search area, with records dated between 1988 and 2013. Species recorded within 1 km of the Site included Daubenton's, Noctule, Common Pipistrelle, Soprano Pipistrelle, *Pipistrellus sp.*, *Myotis sp.*, and unknown bat species. There are no bat records for the surveyed building. Records mostly consist of in-flight observations and roosts within the area of Wombwell.
- 3.1.5.9 There are no Granted European Protected Species Application for bat species within 2 km of the Site

Other Fauna

- 3.1.5.10 There are no records of Badger, Otter or Brown Hare within 1 km of the Site.
- 3.1.5.11 BBRC provided five records of Hedgehog within 1 km of the Site, with the nearest record 650 m from the Site on Littlefield Lane, Wombwell (dated 04/07/2018).
- 3.1.5.12 NEYEDC provided 10 records of Water Vole within 1 km of the Site. Records were associated with Parkhill Local Wildlife Site > 0.5 km to the east. Records dated 2000 – 2007.

¹⁵ Stanbury, A., *et al* (2021) The status of our bird populations: the fifth Birds of Conservation Concern in the United Kingdom, Channel Islands and Isle of Man and second IUCN Red List assessment of extinction risk for Great Britain. British Birds 114: 723-747.

3.2 Preliminary Ecological Appraisal

- 3.2.1.1 The Site covers 1,810.2 sqm and comprises the vacant Nu-Well Shopping Mall, positioned within the central region of the town of Wombwell. Located within the Site is the vacant Nu-Well Shopping Mall and urban land to the west. The Site has vehicle access on the eastern boundary via Summer Lane. An urban landscape dominates the local area, with vegetated habitats within 250 m of the Site limited to gardens and roadside trees.
- 3.2.1.2 There are no waterbodies within the Site. The Site is located at an altitude of 63 m above sea level and is positioned within an urban landscape to the west of Summer Lane and north of Hough Lane.
- 3.2.1.3 Baseline Habitats within the Site include Developed Land; Sealed Surface, Artificial Unvegetated; Unsealed Surface, and Ruderal / Ephemeral. Baseline habitats are shown in Figure 2 – Baseline Habitat Plan and in Photos 1-8 in Appendix 2. Based on aerial imagery, the habitats present on the Site are largely unchanged since at least 2002.

3.2.2 Habitats

- 3.2.2.1 The baseline habitats on the Site are shown in Figure 2 – Baseline Habitat Map.

Urban – Developed Land; Sealed Surface – 967.1 sqm

- 3.2.2.2 Developed Land; Sealed Surface habitat within the Site comprises the Nu-Well Shopping Mall.
- 3.2.2.3 Nu-Well Shopping Mall, the former Wombwell Reform Club, is a vacant commercial building fronting Summer Lane and Hough Lane. The building is of redbrick construction with a complex layout. The building has a complex roof layout with numerous pitched elevations on the eastern part of the building, with the western part of the building including a series of flat-roof sections set at different levels.
- 3.2.2.4 The pitched roof elevations are clad in slate tiles with matching ridge tiles; the majority of the roof tiles were present, although with several lifted, slipped and cracked tiles were noted. Coping stones are present on the roof elevations along with sections of timber fascia and defunct guttering. Pointing on the external elevations was generally in a good state of repair with only occasional gaps/crevices noted where the pointing has failed. The building has uPVC windows with glass panes intact. Areas on the eastern elevation of the building have been rendered. Overall, the building was considered to be in a poor/moderate state of repair.
- 3.2.2.5 Where the loft voids could be viewed from the ground floor rooms, the roof structure of the building has a timber frame with no felt located below the roof tiles.
- 3.2.2.6 Vegetation present on the external and roof elevations included Butterfly Bush *Buddleja davidii* and Hart's Tongue Fern *Asplenium scolopendrium*.
- 3.2.2.7 Rockspray Cotoneaster *Cotoneaster horizontalis*, which is listed as an invasive species on Schedule 9 of The Wildlife and Countryside Act 1981, was recorded on the southern boundary of the Site; between the Site and the garden of an adjacent property. It is an offence to plant or otherwise cause this species to grow in the wild.
- 3.2.2.8 Internally the building contains a series of ground floor rooms that form the former shopping mall. Internal rooms include a series of largely empty business units, central corridors and walkways, and storage compartments and ancillary rooms. The internal area of a building was in a poor state of repair with several areas of water ingress noted. There was no access to the loft voids within the building; access points to the loft voids are likely located above the false ceilings. Located below the ground-floor rooms in the south-east corner of the building are two business units; these are accessed from the street front and have external roller doors; both appeared to be disused.

Urban – Artificial Unvegetated; Unsealed Surface – 725.3 sqm

- 3.2.2.9 Areas of Artificial Unvegetated; Unsealed Surface are located throughout the Site, typical of a previously developed Site. These areas include parcels of compacted stone/gravel/dirt. These areas are in occasional use as a carpark.
- 3.2.2.10 Common self-sown species were recorded in the Artificial Unvegetated; Unsealed Surface habitat with coverage below 10 %; species included Red Valerian *Valeriana rubra*, Dandelion *Taraxacum officinale*, Annual Meadow-grass *Poa annua* and Greater Plantain *Plantago major*.

Sparsely Vegetated Habitat – Ruderal / Ephemeral – 117.8 sqm

- 3.2.2.11 Two small pockets of Ruderal / Ephemeral habitat are located in the south-east region of the Site. These are likely to have been previously managed as ornamental planters, although are now dominated by grass/ruderal species due to a lack of management in recent years.
- 3.2.2.12 A further area of Ruderal / Ephemeral habitat is located in the western region of the Site; this habitat has developed on previously developed land and due to a lack of management. Compacted stone/gravel was evident below the surface vegetation.
- 3.2.2.13 Species present within the Ruderal / Ephemeral habitat included Yarrow *Achillea millefolium*, Common Nettle *Urtica dioica*, Broad-Leaved Dock *Rumex obtusifolius*, Yorkshire Fog *Holcus*, Red Fescue *Festuca rubra*, White Clover *Trifolium repens*, Ragwort *Senecio jacobaea*, Dandelion *Taraxacum officinale*, Creeping Buttercup *Ranunculus repens*, Creeping Bent *Agrostis stolonifera*, Bush Vetch *Vicia sepium*, Cleavers *Galium aparine*, Cock's-foot *Dactylis glomerata*, Ribwort Plantain *Plantago lanceolata*, Diels's Cotoneaster *Cotoneaster dielsianus*, Ivy *Hedera helix*, Bramble *Rubus fruticosus*, Annual Meadow-grass *Poa annua* and Daisy *Bellis perennis*.
- 3.2.2.14 Self-seeded Blackthorn *Prunus spinosa*, Holly *Ilex aquifolium* and Silver Birch *Betula pendula* saplings were recorded within the Ruderal / Ephemeral habitat.

3.2.3 Birds

- 3.2.3.1 The buildings and vegetation within and edging the Site were considered suitable for the nesting purposes of common species such as Blackbird, House Sparrow and Wren. No previous bird nests were recorded on Site.

3.2.4 Bats

Preliminary Roost Assessment

- 3.2.4.1 No direct evidence to indicate bat roosting activity was recorded within the Nu-Well Shopping Mall building.
- 3.2.4.2 The Nu-Well Shopping Mall building was considered to hold features of Low Bat Roost Potential. Features of potential value to roosting bats included gaps/crevices on the external elevations (i.e., Appendix 2: Photo 3) and occasional gaps below roof and ridge tiles.
- 3.2.4.3 No trees within and/or surrounding the Site were recorded to hold features suitable for roosting bats.

Dusk Emergence Bat Survey

- 3.2.4.4 During the dusk emergence bat survey on 19th September 2024, no bats were recorded to emerge from roosting locations within the surveyed building. During the survey, foraging and commuting activity was recorded within the Site and local area from Noctule, Common Pipistrelle and Soprano Pipistrelle bats.
- 3.2.4.5 Refer to the following report for full survey details:
- 3.2.4.6 Nu-Well Shopping Mall, Hough Lane, Wombwell, Barnsley, S73 0DR – Dusk Emergence Survey Report – September 2024 – Vale Ecology Ltd.

Other Considerations

- 3.2.4.7 Overall, the immediate surrounding habitats offer sub-optimal conditions for foraging and commuting bats, due to the dominance of commercial/residential buildings, infrastructure and sources of artificial lighting.

3.2.5 *Great Crested Newt*

- 3.2.5.1 There are no ponds or waterbodies present within the Site.
- 3.2.5.2 Based on analysis of Ordnance Survey mapping and aerial imagery, no ponds were identified within 500 m of the Site. The nearest ponds to the Site include a medium-sized pond 667 m to the east beyond the Trans Pennine Trail and a small-sized pond 725 m to the east on an industrial estate.
- 3.2.5.3 A disused Canal is located >330 m to the east, adjacent to Valley Way and the Trans Pennine Trail; several barriers to amphibian movements, including roads and buildings, are located between the Site and the disused Canal.
- 3.2.5.4 The dominant habitats within the Site, including the developed land, buildings and compacted stone were considered to be negligible-low potential value to Great Crested Newts during their terrestrial phase. The areas of Ruderal / Ephemeral habitat may provide suitable habitat for foraging and sheltering amphibians, albeit on a very small scale.

3.2.6 *Other Fauna*

- 3.2.6.1 No evidence of Badger was identified at the Site. Hedgehog could potentially use the habitats within the Site for resting/sheltering purposes. Based on the nature of the habitats at the Site, it is considered very unlikely that reptiles will occur.
- 3.2.6.2 No suitable habitats for resident populations of Brown Hare, Water Vole or Otter have been identified within the immediate vicinity of the Site.

Survey Information	
	Site boundary (1,810.2m ²)
UKHab Habitat Results	
	u1b - Developed land; sealed surface (967.1m ²)
	u1c - Artificial unvegetated, unsealed surface (725.3m ²)
	81 - Ruderal or ephemeral (117.8m ²)

4 Biodiversity Net Gain Assessment

4.1 *Baseline Habitats*

4.1.1.1 Information on the Baseline Habitats within the Site are presented in Section 3.2.2 of this Report and are shown within Figure 2.

4.2 *Habitat Retention*

4.2.1.1 None of the baseline habitats will be retained as part of the proposed development.

4.3 *Habitat Creation*

4.3.1.1 The feasibility BNG calculations include the creation of Developed Land; Sealed Surface, Artificial Unvegetated; Unsealed Surface, Modified Grassland, Urban Trees, and Introduced Shrub.

4.3.2 *Developed Land; Sealed Surface – 1,747.2 sqm*

4.3.2.1 2138.4 sqm of Developed Land; Sealed Surface to be created throughout the Site. To include the new buildings and carpark.

4.3.3 *Introduced Shrub – 63 sqm*

4.3.3.1 63 sqm of Introduced Shrub to be created in the south-east region of the Site.

4.4 *Biodiversity Net Gain Results*

4.4.1.1 The Biodiversity Net Gain Assessment as detailed above and presented in Figure 3 would result in:

- The outcome of the BNG calculations based on the Proposed Layout shown in Appendix 3 would result in a Total Net Habitat Unit Change of -0.0350 (negative; equivalent to a loss of -74.20% against the baseline value of 0.0471 Habitat Units). Trading Rules Satisfied: No.

4.4.1.2 The full BNG calculations are presented in a separate excel document.

4.5 *Additional Information*

4.5.1.1 Pre-development biodiversity value of the onsite habitats: 0.0471 Habitat Units and 0.0 Hedgerow Units.

4.5.1.2 Date the onsite pre-development biodiversity value was calculated: 19th September 2024.

4.5.1.3 Version of the Metric: Small Sites Metric (Biodiversity Metric 4.0)

4.5.1.4 Date biodiversity metric was published: February 2024 (Updated July 2024).

4.5.1.5 Does the pre-development biodiversity value factor in the loss of any onsite habitat because of activities carried out before the submission of this application. No.

4.5.1.6 Does the development site have irreplaceable habitats (corresponding to the descriptions in column 1 of (Schedule to the Biodiversity Gain Requirements (Irreplaceable Habitat) Regulations)) which are:

i. on land to which the application resides; and

exist on the date of the application for planning permission, (or an earlier agreed date). No.

5 Conclusions & Recommendations

5.1 Protected Sites

- 5.1.1.1 Based on the development proposal of a small mixed development at the Site, it is not considered that the development will impact protected sites within the local area.

5.2 Habitats

- 5.2.1.1 The Site covers 1,810.2 sqm and comprises the vacant Nu-Well Shopping Mall, positioned within the central region of the town of Wombwell. Located within the Site is the vacant Nu-Well Shopping Mall and urban land to the west. The Site has vehicle access on the eastern boundary via Summer Lane. An urban landscape dominates the local area.
- 5.2.1.2 Baseline Habitats within the Site include Developed Land; Sealed Surface, Artificial Unvegetated; Unsealed Surface, and Ruderal / Ephemeral. Baseline habitats are shown in Figure 2 – Baseline Habitat Plan and in Photos 1-8 in Appendix 2. Based on aerial imagery, the habitats present on the Site are largely unchanged since at least 2002.
- 5.2.1.3 The habitats within the Site were considered to be of low ecological value.

Recommendations

- 5.2.1.4 Native species would be included within the landscape design plan for the Site along with additional habitat features such as native tree planting. A suitable Construction Ecological Mitigation Plan (CEMP) and Biodiversity Enhancement Management Plan (BEMP) should be produced for the project.
- 5.2.1.5 Care should be taken to ensure no artificial lighting is directed onto the habitats surrounding the Site with any *Cotoneaster horizontalis* within the Site removed in accordance with current guidelines.

5.3 Birds

- 5.3.1.1 The buildings and vegetation within and edging the Site were considered suitable for the nesting purposes of common species such as Blackbird, House Sparrow and Wren. No previous bird nests were recorded on Site.

Recommendations

- 5.3.1.2 Where possible, any works affecting potential bird nesting areas (ground clearance etc.) should be undertaken outside the main bird nesting period of March to August (inclusive). If this is not possible, any such works undertaken within the bird nesting period (March to August inclusive) should be supervised by a suitably qualified ecologist. The supervising ecologist should advise all site personnel of the potential presence of nesting birds, their legal protection and the need to minimise disturbance of nesting birds. If active nests are present, they must be retained in situ undisturbed until the nests are no longer active. A nest is classed as active when it contains eggs or chicks and whilst being built.
- 5.3.1.3 Measures to enhance the nesting opportunities for birds within the Site to be detailed within the Biodiversity Enhancement Management Plan (BEMP).

5.4 Bats

- 5.4.1.1 BBRC supplied 35 records within the search area, with records dated between 1988 and 2013. Species recorded within 1 km of the Site included Daubenton's, Noctule, Common Pipistrelle, Soprano Pipistrelle, *Pipistrellus sp.*, *Myotis sp.*, and unknown bat species. There are no bat records for the surveyed building. Records mostly consist of in-flight observations and roosts within the area of Wombwell. There are no Granted European Protected Species Application for bat species within 2 km of the Site
- 5.4.1.2 No direct evidence to indicate bat roosting activity was recorded within the Nu-Well Shopping Mall building. The Nu-Well Shopping Mall building was considered to hold features of Low Bat Roost Potential. Features of

potential value to roosting bats included gaps/crevices on the external elevations (i.e., Appendix 2: Photo 3) and occasional gaps below roof and ridge tiles.

5.4.1.3 During the Dusk Emergence Bat Survey¹⁶ on 19th September 2024, no bats were recorded to emerge from roosting locations within the surveyed building. During the survey, foraging and commuting activity was recorded within the site and local area from Noctule, Common Pipistrelle and Soprano Pipistrelle bats.

5.4.1.4 No trees within and/or surrounding the Site were recorded to hold features suitable for roosting bats. Overall, the immediate surrounding habitats offer sub-optimal conditions for foraging and commuting bats, due to the dominance of commercial/residential buildings, infrastructure and sources of artificial lighting.

Recommendations

5.4.1.5 Whilst no evidence of bat roosting activity was recorded during the Preliminary Bat Roost Assessment or Dusk Emergence Survey to maintain good practice it would be recommended that works are completed in accordance with the below points:

- Ensure all personnel are aware of the findings and working practices within this report. The removal of any tiles etc. should follow a 'soft strip' approach with such works undertaken in a controlled manner by hand / hand tools where possible.
- In the unlikely event that a bat is discovered during developments all works would cease until the project ecologist has liaised with Natural England on the subsequent development procedures and licencing requirements. In the unlikely eventuality of a bat or evidence of bats such as droppings being found during other construction works, the contractors should stop immediately and contact the project ecologist.
- Contractors must avoid handling a bat where possible, and should a bat be discovered during development works the bat should be allowed to disperse on its own accord, or wait for the licensed handler to collect the bat. If it is necessary to remove a bat to avoid it being harmed, gloves MUST be worn. It should be carefully placed in a cardboard box and kept in the dark in a quiet place until the licensed ecologist arrives on site.

5.4.1.0 Measures to enhance roosting opportunities for bats within the Site to be detailed within the Biodiversity Enhancement Management Plan (BEMP).

5.4.1.1 A Sensitive Lighting Strategy should be developed in order to maintain dark corridors for bats along the Site boundaries; this strategy should be in accordance with current guidance (Bats and Artificial Lighting at Night; Bat Conservation Trust; Guidance Note 08/23).

5.5 *Great Crested Newt*

5.5.1.1 BBRC provided records of Great Crested Newts (two records), Common Frog (seven records), Smooth Newt (one record) and Common Toad (19 records) within 1 km of the Site. The two Great Crested Newt records provided by BBRC were for Wombwell Golf Course Pond > 0.8 km to the south-west of the Site at SE395021 (dated 23/06/1991). There are no Great Crested Newt Class Licence Returns, Great Crested Newt 'positive' results from the Great Crested Newt Pond Surveys (2017-2019) or Granted European Protected Species Application for Great Crested Newt within 2 km of the Site.

5.5.1.2 There are no ponds or waterbodies present within the Site. Based on analysis of Ordnance Survey mapping and aerial imagery, no ponds were identified within 500 m of the Site.

¹⁶ Nu-Well Shopping Mall, Hough Lane, Wombwell, Barnsley, S73 0DR – Dusk Emergence Survey Report – September 2024 – Vale Ecology Ltd.

- 5.5.1.3 A single waterway was recorded within 500 m of the Site. This being a disused Canal located >330 m to the east, adjacent to Valley Way and the Trans Pennine Trail; several barriers to amphibian movements, including roads and buildings, are located between the Site and the disused Canal.
- 5.5.1.4 The likelihood of Great Crested Newts being present within the terrestrial habitats within the Site is considered to be very low. This conclusion is based on there being no records of Great Crested Newt within 500 m of the Site, there being no ponds on or within 500 m of the Site, and with the dominant habitats within the Site, including the developed land, buildings and compacted stone, considered to be negligible-low potential value to Great Crested Newts during their terrestrial phase. The areas of Ruderal / Ephemeral habitat may provide suitable habitat for foraging and sheltering amphibians, albeit on a very small scale.
- 5.5.1.5 No further surveys recommended.

5.6 *Other Fauna*

- 5.6.1.1 No evidence of Badger was identified at the Site. Hedgehog could potentially use the habitats within the Site for resting/sheltering purposes. Based on the nature of the habitats at the Site, it is considered very unlikely that reptiles will occur.
- 5.6.1.2 No suitable habitats for resident populations of Brown Hare, Badger, reptiles, Water Vole or Otter have been identified within the immediate vicinity of the Site.

Recommendations

- 5.6.1.3 Standard mitigation measures should be followed for Hedgehog (i.e. pre-commencement ecological toolbox talk). Where possible, excavations must not be left overnight unless securely covered or provided with an earth or timber ramp not less than 300 mm wide and no steeper than 45 degrees (to allow for escape of trapped animals i.e., Hedgehog). Any excavations should be checked each morning before any works begin on the site to be checked for trapped animals.

5.7 *Biodiversity Net Gain Assessment*

- 5.7.1.1 This report presents a Biodiversity Net Gain Assessment.
- 5.7.1.2 The outcome of the BNG calculations based on the Proposed Layout shown in Appendix 3 would result in a Total Net Habitat Unit Change of -0.0350 (negative; equivalent to a loss of -74.20% against the baseline value of 0.0471 Habitat Units). Trading Rules Satisfied: No.
- 5.7.1.3 Given the urban proposals for the Site, and the plans to maximise the available space for parking etc. there was no land available for landscape input and delivery of habitat units to achieve +10% gain on the baseline.
- 5.7.1.4 The full BNG calculations are presented in a separate excel document.

Appendix 1. Legislation & Conservation Context

European Protected Species (GCN, Otter, all Bats)

Great Crested Newt (GCN), otter and all British bat species are fully protected through The Conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 as European Protected Species (EPS). They also receive some protection through inclusion in Schedule 5 of the Wildlife and Countryside Act 1981 (as amended).

Under the legislation, it is an offence to deliberately capture, injure or kill a GCN, otter or bat. It is an offence to damage or destroy a breeding site or resting place of a GCN, otter or bat. It is also an offence to intentionally or recklessly disturb a GCN, otter or bat while it is occupying a structure or place which it uses for shelter or protection; or obstruct access to any structure or place which it uses for that purpose.

It is also an offence to deliberately disturb a GCN, otter or bat; in particular any disturbance which is likely (a) to impair their ability - (i) to survive, to breed or reproduce, or to rear or nurture their young, or (ii) in the case of animals of a hibernating or migratory species, to hibernate or migrate; or (b) to affect significantly the local distribution or abundance of the species to which they belong.

The 'appropriate authority' (Natural England in England) has powers to issue licences for various purposes including - (a) scientific or educational purposes... and (e) preserving public health or public safety or other imperative reasons of overriding public interest including those of a social or economic nature and beneficial consequences of primary importance for the environment. The appropriate authority shall not grant a licence under this regulation unless they are satisfied - (a) that there is no satisfactory alternative, and (b) that the action authorised will not be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range. It is an offence for any person authorised by virtue of a licence to which this paragraph applies to contravene or fail to comply with any condition which the licence requires him to comply with.

Nesting Birds

All wild birds in the UK are protected under Section 1 of the Wildlife and Countryside Act 1981 (as amended) which makes it an offence to intentionally kill, injure or take any wild bird or take, damage or destroy the nest (whilst being built or in use) or its eggs. Bird species listed in Schedule 1 of the 1981 Act, e.g. barn owl, receive further protection which makes it an offence to intentionally or recklessly disturb these species while building a nest or in, on or near a nest containing eggs or young; or to disturb dependent young of such a bird.

APT 03	46.51	432	2.90 - 0.36 = 2.54	1B1P
APT 04	80.69	752	5.62 - 1.08 = 4.54	2B3P
APT 05	49.79	462	3.15 - 0.36 = 2.79	1B1P
APT 06	47.41	462	3.15 - 0.36 = 2.79	1B1P
APT 07	46.72	401	3.15 - 0.36 = 2.79	1B1P

Waste Strategy
Prior to first occupation of the flats, the applicant shall submit for approval to the local planning authority, a scheme for the management and storage of waste at the flats, including details of bin store location and design, maintenance of the area and means of placing of bins for collection and their return and a collection schedule.

All such requirements of the approved scheme shall be implemented prior to occupation and subsequently complied with.

Sound Separation
Prior to first occupation of the flats, the applicant shall submit for approval to the local planning authority, a report demonstrating the acoustic assessment and specified design criteria required to achieve the following standards.

A maximum noise level in the following locations of:

Living room/dining area - 35 dB LAeq, 16hr (07.00 - 23.00hrs) due to representative external ambient noise;

Bedroom (daytime resting) - 35 dB LAeq, 16hr (07.00-23.00hrs) due to representative external ambient noise;

Bedroom - 30 dB LAeq, 8hr (23.00 - 07.00hrs) and individual noise events not normally exceeding 45dB max (F time weighting) due to representative external ambient noise;

Bedrooms - 47 dB (Leq, 5 minutes), in the 63 Hertz and 41 dB (Leq, 5 minutes) in the 125 Hertz octave centre frequency bands, between the hours of 23:00 and 07:00, during times of typical amplified sound from the nearby licensed premises.

These standards would need to be met with windows closed. Post-completion testing, once satisfied that the proposals would meet these standards, would be required.

This drawing has been produced for PLANNING purposes only and should not be used for any other purpose.
This drawing may be subject to amendment whilst seeking approvals from the Local Authority Work undertaken prior to consent is done so at clients risk.
Any surveyed information incorporated within this drawing cannot be guaranteed as accurate unless confirmed by fixed instrumentation.
Do NOT Scale from this drawing, if in doubt Ask.
