Native tree planting to boundary to provide buffer zone. Understorey shrub planting to consist of predominantly native species to create layered vegetation structure.

Buffer zone to site boundary. Planting consists of predominantly native species.

Residential boundary to consist of light foliage medium/ small trees to provide screening at canopy level whilst avoiding unacceptable overshadowing of rear gardens.

Fastigiate trees to reinforce pedestrian route. Narrow form provides 'vertical greening' without obscuring visibility.

BOUNDARY MIX
Cornus alba 'Sibirica' 15%
Cotoneaster watereri 'John Waterer' 15%
Elaeagnus ebbingei 10%
Euonymus europaeus 10%
Prunus lusitanica 10%
Rosa canina 15%
Viburnum sargentii 'Onondaga' 15%
Viburnum tinus 10%
