

Maintenance Agreement: ASGF Construction Limited

MAINTENANCE ACTIVITIES SCHEDULE - GRASS, NEW & RETAINED TREES, HEDGEROW, RETAINING WALL, CAR PARKING SPACES, SHARED DRIVES

Development: Garden House Lane Monk Bretton S71 2EA

Date: 21st October 2022

INTRODUCTION

This Landscape Management Plan is designed to provide information regarding the long term management of the general amenity areas being retained or created on this development. This document compliments the information provided as part of the tender package including the Detailed Planting Plans and Proposed Layout.

The plan outlines the maintenance principles and objectives and gives a detailed programme for the maintenance of the areas for the lifespan of the development.

The plan covers all aspects of the soft landscaping within the amenity areas to include; grass, new and retained trees, hedgerow, retaining wall, car parking space, and shared drives which are not being maintained by the individual plots.

The Landscape Management Plan is a live document and may therefore be subject to review based on the findings of monitoring of the success of initial management.

For Management & Maintenance of the private landscaped areas please refer to the individual plots, deeds of transfer title documents.

OBJECTIVES

The objectives for the Maintenance Plan are:

- To ensure the successful establishment and long-term health of all landscape elements for the benefits of the wider community.
- To allow the residents to understand the expectations of the required management, and to give them a point of contact if required.
- To allow the local authority satisfaction that the area will be managed appropriately.
- To ensure best horticultural and health & safety practices at all times.
- To ensure that methods employed enhance and encourage wildlife, wherever possible.
- To identify defects as soon as possible in order to minimise any damage and rectify at the earliest opportunity.
- To ensure access to the area by all members of the general public and for the area to remain as such permanently.

SERVICE LEVELS AGREEMENT

The Grounds Maintenance & Management teams will:

- Provide service to the development within this plan with two visits per month based on a 13 - 16 day rotation between March and October and one visit per month between the months of November and February.
- Ensure that all materials and workmanship is to be of the highest possible standard in accordance with relevant good practice.
- Provide Periodic inspections of paved areas within the POS and report any defects.
- Ensure that all catch-pits and tail-walls are inspected following heavy rainfall and any silt or gravel buildup reported.
- Ensure that all work will be carried out by appropriately skilled and experienced operatives for the specific type of work, including where Control of Substances Hazardous to Health (COSHH) is applicable.
- Ensure that work is only to be carried out while soil and weather conditions are suitable.
- Provide only machinery and tools suitable for site conditions and the work to be carried out are to be used. Hand tools should be used around trees and in confined areas.
- Ensure that all grass cutting machinery to be well maintained and correctly adjusted to give a clean and even cut. The machinery shall be suitable for the size area to be cut.
- Ensure that all woody cuttings are removed from site.
- Ensure that all Soil, stones and other debris to be removed from hard surfaces and the area left in a clean and tidy condition after maintenance operations are complete.
- Ensure that all litter is to be collected from all soft landscape areas and removed from site.
- Not carry out any burning on site.
- Undertake a pro-active approach to weed, pest and disease control with any required measures taken promptly. Any plant losses as a result of weed, pest or disease damage are to be replaced as soon as possible at the appropriate planting season.
- Ensure that Chemicals are only to be used where specified and approved.
- Prune all vegetation, as necessary to avoid obstruction of pedestrians or vehicles, security cameras, lighting or visibility-splays.

GRASSED AREAS - Short Mown Amenity Grass

Maintenance objectives:

- To provide an even and well-maintained appearance and to control weeds.

Management requirements:

- The Grounds Maintenance Team shall use appropriate equipment and machinery driven or operated in a manner appropriate to the task.
- The Grounds Maintenance Team shall ensure that machines and equipment do not damage the sward or its visual appearance.
- Once a cut or treatment has started on a site it shall be complete in one operation.
- Litter, stones and other debris shall be collected immediately prior to cutting or treatment being undertaken, and removed off site.
- The Grounds Maintenance Team shall immediately on completion, or at the end of each working day, clear any cuttings, earth or other debris that lands on surrounding hard surfaces as a result of cutting or treatments to grass areas.
- Every care shall be taken when mowing around trees in grass areas. Where overhanging branches prevents the specified machinery being used grass shall be cut by other appropriate means.
- The Grounds Maintenance Team shall exercise every care in carrying out works around flat and protruding obstacles in grass areas. Heavy or vibrating machinery shall not be driven over manhole and duct covers unless it is obvious they are strong enough to remain undamaged.
- The Grounds Maintenance Team shall ensure that any arisings or residue from any activity involved in maintaining the grass areas do not enter any water course, drain or sewer.
- Grass shall be cut to a consistent height over the specified area. There shall be no tufts or bents left standing above the general sward level.
- Short amenity grassed areas shall be mown to maintain a height between a maximum of 65mm and a minimum of 25 mm. The cutting season is to extend from the first week of March to the last week of October each year, at least every three weeks. During the winter grass shall be maintained at a height of 60 mm.
- Grass shall not be cut in adverse weather and ground conditions. Cutting shall only recommence when it is safe to do so without danger of damaging the sward, surface levels or contours of the ground.
- Where inclement weather conditions delay normal cutting programmes our maintenance contractor will be required to resume work as soon as practically possible and is required to restore works to the specified standard by regular, repeated cutting, as necessary.
- Following delays occasioned by inclement weather where grass length exceeds the maximum specified height the Grounds Maintenance Team shall collect and dispose to tip the arising of the first cut following the delay.
- Where weather conditions inhibit grass growth our Grounds Maintenance Team may vary the minimum height of cut. During prolonged dry weather when grass growth is minimal, ensure all bents, flowers and seed heads are removed by rotary mowers.
- All grass clippings falling on paths, roads and other paved surfaces shall be swept-up and removed before the Grounds Maintenance Team leaves site.

- Where grass areas abut planted areas, hard surfaces, boundary fences, walls, trees or other obstruction the grass shall be trimmed at every third cut and arisings disposed to tip.
- Edges to planting beds and paved areas shall be re-cut with a half-moon tool once, annually to maintain a defined line closely parallel to the edge of the surface. Edges shall be cut vertically to a minimum depth of 50 mm.
- Where damage has occurred to cut edges turf edges shall be repaired and then re-cut to original line. Beds and edge gaps shall not be significantly enlarged by edge cutting.
- Grass abutting existing and new hedges and other plant growth shall be trimmed level with the general sward level by strimming at every third cut. Litter and debris shall be removed from hedge lines.

GRASSED AREAS - Infrequently Mown Amenity Grass / Wildflower Grass

Maintenance objectives:

- To ensure the creation of suitable conditions for the wildflower seeds to establish without being outcompeted by the grass nurse crop.
- To ensure the correct cutting regime is implemented depending on whether the sward is established in Autumn or Spring.

Management requirements:

Spring Establishment:

Year 1

- 1st cut to 4-7 cm approx 6 weeks after sowing if sufficient material has established
- 2nd cut to 4-7 cm approx in May (when sward height exceeds 10 cm)
- 3rd cut to 4-7 cm in September/October
- All arisings shall be raked up and removed from site

Year 2 (where cutting is carried out)

- 1st cut to 4-7 cm March/April
- Final cut to 4-7 cm end September/October.
- All arisings to be removed from site

Years 2/3 to 5

- Subsequent maintenance of wildflower grass areas shall be undertaken to manage grass at different heights to create a diversity of habitats which will enable the colonisation of a range of plant, bird, small mammal, invertebrate and insect life. Alterations to the cutting regime will ultimately be dependent on the sward composition and how the various areas are establishing and being used and will include:

- Cutting in Autumn (end September/October) once grasses and flora has seeded. Removing all arisings from any grass maintenance operations from the grass surface and ensuring that clippings / grassy material do not enter the pond or the overflow channel. Leaving small piles of grass clippings no more than 1500mm x 1500mm x 300mm deep maximum on site in suitable locations within the grass areas to provide suitable habitat for insects and reptiles.

Remedial Works

- The Grounds Maintenance Team shall be responsible for remedial works on grassed areas within the contract boundary, disturbed by cultivations, planting or other operations carried out in the execution of their works.
- In Spring and Autumn, the Grounds Maintenance Team shall re-seed any areas which fail to germinate, with approved grass seed mix. Topsoil shall be cultivated and aerated by forking as necessary to tie in with adjacent levels to promote good sward establishment.
- Re-turfing of damaged or bare areas identified by the Grounds Maintenance Team shall comply with all good horticultural practice. The Grounds Maintenance Team shall remove or make up all areas to a level sufficient to take replacement turves. The base of the area will be lightly broken up and levelled prior to final placement of the turf.

Autumn Establishment:

Year 1

- 1st cut to 4-7 cm in March (if sufficient material)
- 2nd cut to 4-7 cm in early May
- 3rd cut to 4 cm in September
- All arisings shall be raked up and removed from site.

Year 2 (where cutting is carried out)

- 1st cut to 4-7 cm March/April
- Final cut to 4-7 cm end September/October.

NEWLY PLANTED & RETAINED HEDGEROWS

Maintenance objectives

- To provide dense, even and defensible boundaries.

Maintenance requirements

- Hedges shall be cut or trimmed as often as required to meet the performance standards according to their type and function. They shall cut outside of bird nesting season; November to January.
- Hedges shall all be 'A' framed to encourage a dense and viable branching, well furnished with healthy tissue / growth that receives full sunlight.
- Hedges shall be regularly maintained to ensure that they do not overhang the footpath, become an obstruction or restrict highway visibility.
- The Grounds Maintenance Team shall use appropriate equipment and machinery driven or operated in the appropriate manner for each task.
- The Grounds Maintenance Team shall ensure that machines and equipment do not damage hedge plants or mar the visual appearance of the hedge.
- Once a cut has been started on an individual hedge it shall be complete in one operation.
- The Grounds Maintenance Team shall immediately on completion, or at the end of each working day, clear all cuttings from the site.
- Cutting shall be with hand held shears or reciprocating hedge cutters and/or secateurs unless otherwise stated.
- The crown of trees within hedges shall be lifted to a height above the top line of the hedge, where required.
- Damaged, diseased, dead and missing plants that create gaps in the hedge lines shall be replaced with new plants.
- Hedge bases shall be maintained to prevent other weed growth invading the hedge line.
- Clear hedges and bases of litter once per month.

NEWLY PLANTED TREES

Maintenance Objectives:

- Standard trees shall be encouraged to develop as upright, healthy individuals with well formed, balanced crowns. Side growth shall be removed and lower crown lifting undertaken to ensure minimum branch clearances above ground level of at least 2 - 5m.

Maintenance Requirements:

- The Grounds Maintenance Team shall check stakes and ties at each grass cutting visit, and adjusted/replaced as necessary.
- Maintain a 600mm diameter grass and weed-free area at the base of each tree.
- Cut-back any damaged bark and treat the wound(s) with fungicidal sealant.
- All stakes and ties shall be removed when appropriate.
- During years 1-5, any dead, dying, diseased or lost tree shall be replaced on a like-for like basis as appropriate.
- After year 5, any dead, dying, diseased or lost tree shall be replaced with a standard tree of the same species.

EXISTING TREES

Management objectives:

- To protect the wellbeing of existing trees and to ensure their continued contribution to the aesthetics and ecological benefit of the site.

Management requirements:

- Any works to existing trees shall be carried out in accordance with BS3998:1989 and should be undertaken by competent and experienced operative. All work shall be undertaken at the appropriate time and checks shall be made with the consent of local planning authority.
- All work shall be carefully carried out to avoid damage to the trees being treated or neighbouring trees. No retained tree shall be used for anchorage or winching purposes.
- All existing trees shall be checked annually for signs of deterioration or distress and the appropriate actions undertaken where required.
- All diseased wood, prunings and rubbish should be removed from the site.
- Heavy branches shall be removed in sections and undercut to avoid tearing the bark, and thereafter lowered by slings. No branch stumps should be left and cuts should be sealed with fungicidal sealant. No cuts should be capable of holding water.
- Weed control by hand to ensure area to base of each plant is weed free. Check stakes and guards are not suppressing growth and remove by the end of year 5. Replace any dead/dying stock in winter.

NATIVE PLANTING

Maintenance objectives:

- To develop and maintain a healthy block of native plants with a variety of heights, densities and wildlife benefits while providing screening of adjacent residential housing.

Management requirements, general:

- All damage caused in gaining access and in maintaining this area shall be made good by the Grounds Maintenance Team.
- Maintain a gap of at least 0.5m between the closest vegetation and any fences or buildings.
- Maintain a 500mm diameter grass and weed-free area around the base of each plant until the canopy closes.
- Apply systemic herbicide for the whole planted area and alongside all residential fences and buildings at the end of May, again in July and again in late August, using a knapsack, and guarded-spray.
- Remove any noxious weeds, such as Thistle, Bramble, Ragwort, Dock, etc.
- Remove all guards between years 3-5 after planting.
- Replace any dead, dying, diseased or badly damaged plants on a like-for-like basis during years 1-5 after planting. Thereafter, replace as necessary to maintain full cover.
- Strim under fence areas on a monthly basis between May and October, and check area for noxious weeds, (as mentioned above) and any self-set aggressive tree species.
- Apply suitable fertiliser at year two and year five, according to manufacturer's instructions, where appropriate.

LANDSCAPE BUFFER

Management objectives

- To maintain continuous tree cover and manage the woodland on a full sustainable basis.
- To preserve the landscape character of the site.
- To maintain and enhance facilities for public recreation within the woodlands including, where appropriate access for disabled.
- To maximise biodiversity, in particular increasing standing and fallen deadwood and forming conservation piles.
- To ensure public safety as far as it is practicable.

Maintenance requirements

- Selective thinning to both woods.
- Coppicing; Coppicing works will be carried out between 1st November and 1st March in any year.
- Check mulching, ties, tree shelters and soft wood stakes to new trees planted within the woodland areas.
- Replace & replant all newly planted trees which have failed with trees of the same species keeping an area of 1 square metre around each tree clear of weed growth.
- All mulch applied at the time of planting will be refreshed as required.
- All tree shutters and supporting stakes will be maintained for the first five years and then removed in the 6th year after planting.
- Woodland footpaths will be kept free of weed growth and encroaching vegetation and maintained as required throughout the plan period.

RETAINING WALL

Maintenance Objectives:

- To maintain a structurally secure embankment through the use of inspections and routine checks

Management Requirements:

- Retaining wall will be routinely inspected twice yearly by qualified surveyors.
- Routinely check for any presence of bulges as an indication of shifting soil within the retaining wall.
- Routinely inspect the drainage measures set in place at the bottom of the retaining wall to ensure that erosion is not present
- Report any structural issues, damages or abnormalities to CTM Residential
- Routinely check for any vegetation growth which may be present within any gaps and remove as necessary
- Report any cracks and gaps which have developed within the retaining wall
- Carry out regular inspections of any fencing which may be present at the top or bottom of the retaining wall
- Report the presence of any water which is found within the retaining wall, as this is an indication of a substantial amount of water pressure acting upon the wall due to soil saturation.
- Report any pooling of water which is present at the bottom of the retaining wall as this may compromise the foundations

MANAGEMENT PROPOSALS REVIEW & MAINTENANCE SCHEDULE

The sequence of agreement, monitoring & review is set out below. It is envisaged that at each stage agreement will be reached between the Developer, Management Company and Local Authority. The stages of agreement, monitoring and review are set out below:

- Management proposals and annual maintenance schedules to be agreed by all parties involved in the on-going management of the POS areas & associated features specific to this plan.
- The Developer and Management Company may meet on site annually for the lifespan of the development to review the condition of the open spaces.
- Routine monitoring visits and amendments to the plan will be continuous for the lifespan of the development;

General Maintenance Schedule

[illegible]

Short Mown Amenity Grass Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the short mown amenity grass within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Growing Season; To maintain the amenity grass at a height between 65mm & 25mm, trim to re-form the edges.	Maintain a close packed sward.	Each Visit / Fortnightly March to Oct	X	X	X	X	X	X	X	X	X	X	X
Dormant Season; To maintain amenity grass at a height of 60mm, trim to re-from edges.	Maintain a close packed sward.	As req. Nove to Feb	X	X	X	X	X	X	X	X	X	X	X
Hard surfaces will be swept to remove grass clippings following each cut.	Maintain a close packed sward.	Each Visit / Fortnightly	X	X	X	X	X	X	X	X	X	X	X
Supply & apply selective herbicide to manufacturers instructions; to all grassed areas where appropriate	Maintain a close packed sward.	Annually as req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Over-seed patchy areas; as required.	Maintain a close packed sward.	As req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Edging to planting beds & paved areas shall be re-cut once annually.	To maintain a defined line; to a depth of 50mm	Annually as req. Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Grass abutting new & existing hedges or planting beds to be trimmed level with the general sward height; every third cut.	To maintain a defined line & height;	As req.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards, in perpetuity for the lifespan of the development;

Wildflower Grass Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the wildflower grassland within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Maintain the wildflower grass at a height between 40mm & 70mm; two annual cuts	To enhance the floral biodiversity of the grassland habitat..	First cut; March - April Second cut; Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Arisings to be left for a maximum of 1 week after cutting before being removed from site.	To allowed to drop and to provide a refuge for amphibians.	Each Visit / Fortnightly	X	X	X	X	X	X	X	X	X	X	X
Supply & apply selective herbicide to manufactures instructions, where appropriate.	To enhance the floral biodiversity of the grassland habitat.	Annually as req. Sept - Oct.		X			X			X			X
Over-seed patchy areas; as required.	Maintain a close packed sward.	As req. Spring - Autumn.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards, in perpetuity for the lifespan of the development;

New & Retained Hedgerow Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the hedgerow within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Implementation of standard aftercare management, to include replacement of any losses and cutting of half the height of the hedgerow soon after planting.	To ensure hedgerows become successfully established	As required, avoid cutting during bird nesting season (March - September inclusive)	X	X	X	X	X						
During establishment phase (first five years after planting), adjacent grassland vegetation will be trimmed / cut back	To maximise opportunities for newly planted sections to become established.	As req.	X	X	X	X	X						
Undertaking cutting & pruning (usually 50% of each side trimmed annually)	To enhance the biodiversity of the hedgerows.	Annually	X	X	X	X	X	X	X	X	X	X	X
Infill as required any gaps.	To maintain the integrity of the hedgerows	As req.	X	X	X	X	X	X	X	X	X	X	X
Tidy up hedges & bases removing rubbish and litter.	To promote & maintain health growth	Each Visit	X	X	X	X	X	X	X	X	X	X	X
Remove any dead plant materials at the end of each growing season.	To promote & maintain health growth	As req. Sept /Oct						X	X	X	X	X	X

From Year 11 onwards, the condition of the hedgerows shall be reviewed annually, in perpetuity for the lifespan of the development;

New Trees Planting Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the newly planted trees within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11 +
Stakes, ties & tree guards to be checked regularly during establishment phase and loosened, tightened, or replaced as required (all stakes & ties will be removed when appropriate)	To ensure trees/ shrubs become successfully established	Each Visit	X	X	X	X	X						
Maintain a grass & weed free area at the base of each tree	To promote & maintain health growth	Each Visit	X	X	X	X	X	X	X	X	X	X	X
Undertake formative pruning of young trees to encourage good growth & shape.	To promote & maintain health growth	Annually	X	X	X								
Slow release fertiliser;	To promote & maintain health growth	March/ April	X	X	X	X	X						
Replace, on a like for like basis any dead, dying, diseased or lost tree during years 1 - 5.	N/A	As req.	X	X	X	X	X						
After 5 years, dead, dying diseased or lost trees shall be replaced with a standard tree of the same species	N/A	As req.						X	X	X	X	X	X
Within areas that have public access, tree conditions will be reviewed annually to ensure no risk from public from damaged / dead trees.	Reasons of public health and safety	Annually		X	X	X	X	X	X	X	X	X	X

From Year 11 onwards, the condition of the trees shall be reviewed annually, in perpetuity for the lifespan of the development;

Retained Trees Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the retained trees within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11 +
Tree inspections / checks to monitor the health / condition of the individual trees and undertake any remedial pruning required. Particular attention to be paid to trees adjacent to activity areas / footpaths or areas where accessibility of the public may introduce health & safety concerns.		Sept - Oct & after significant storm events.	X	X	X	X	X	X	X	X	X	X	X
Removal of debris trapped in branches		As Required	X	X	X	X	X	X	X	X	X	X	X
Remedial pruning to trees - deadwood, crown clean, crown lift - as required.		Oct - March & after significant storm events.	X	X	X	X	X	X	X	X	X	X	X

From Year 11 onwards, the condition of the trees shall be reviewed annually, in perpetuity for the lifespan of the development;

Native Planting Maintenance Schedule (If applicable)

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the native shrub planting within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Tidy up planting areas, removing rubbish & litter from planting beds	To ensure the planting beds have the best possible chance of establishing.	Each Visit.	X	X	X	X	X	X	X	X	X	X	X
Maintain a grass & weed free area around the base of each plant until the canopy closes.	To promote & maintain health growth	Each Visit.	X	X	X	X	X	X	X	X	X	X	X
Remove any dead plant materials at the end of each growing season.	To promote & maintain health growth	As req.	X	X	X	X	X	X	X	X	X	X	X
		Sept - Oct.											
Damaged, diseased, dead & missing plants to be replaced with new of equivalent size.	To promote & maintain health growth	Annually as req.	X	X	X	X	X	X	X	X	X	X	X
		Sept - Oct.											
Apply suitable fertiliser inline with manufacturers instructions, where appropriate.	To promote & maintain health growth	Annual as req.		X			X			X			X

Cutting required from Year 11 onwards will be undertaken in the winter months, in perpetuity for the lifespan of the development.

Ornamental Shrub Bed Planting Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the ornamental shrub bed planting within the public open space areas;

[illegible]

Ornamental Shrub Bed Planting Maintenance Schedule - Continued

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the ornamental shrub bed planting within the public open space areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Applied approved herbicide as required for the control of pernicious weed growth, where appropriate.	To ensure the planting beds have the best possible chance of establishing.	Annually January to March	X	X	X	X	X	X	X	X	X	X	X
Following each maintenance visit, all traces of footprints within the borders shall be removed and all adjacent hard surfaces shall be appropriately cleaned	To ensure the planting beds have the best possible chance of establishing.	Each Visit.	X	X	X	X	X	X	X	X	X	X	X
Remove all litter, non-organic material and any other debris and dispose of appropriately.	To maximise opportunities for newly planted beds to become established.	Each Visit.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards, in perpetuity for the lifespan of the development;

Landscape Buffer & Bund Maintenance Schedule

The table below presents management activities in order to meet the aim & objectives outlined above. The management activities are only applicable to the landscape buffer and bund within the public open space. areas;

Maintenance Operation	Purpose	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Maintain the wildflower grass at a height between 40mm & 70mm; two annual cuts	To enhance the floral biodiversity of the grassland habitat..	First cut; March - April Second cut; Sept - Oct.	X	X	X	X	X	X	X	X	X	X	X
Arisings to be left for a maximum of 1 week after cutting before being removed from site.	To allowed to drop and to provide a refuge for amphibians.	Each Visit / Fortnightly	X	X	X	X	X	X	X	X	X	X	X
Supply & apply selective herbicide to manufactures instructions, where required.	To enhance the floral biodiversity of the grassland habitat.	Annually as req. Sept - Oct.		X			X			X			X
Over-seed patchy areas; as required.	Maintain a close packed sward.	As req. Spring - Autumn.	X	X	X	X	X	X	X	X	X	X	X

The above maintenance strategy will be continued from Year 11 onwards for the lifespan of the development;

Monitoring

Feature	Monitoring	Timing	Year										
			1	2	3	4	5	6	7	8	9	10	11+
Trees / Woodland Area	To be monitored during each visit to check tree health & identify any dead, dying, damaged or potentially dangerous trees.	N/A	X	X	X	X	X	X	X	X	X	X	X
Hedgerows	To monitor the condition of the hedges and how they change with the management strategy.	May	X	X	X	X	X	X	X	X	X	X	X

Routine monitoring visits and amendments to the plan will be continuous, in perpetuity for the lifespan of the development;
