Existing trees and hedges to North boundary (Cooper Lane)

Espalier fruit trees to provide screening to house and external terrace areas

Solar PV panels on South facing roof

Green roof over garage. Garage doors concealed from view at rear of house.

Lawned area running level up to rear of dry stone wall

Existing levels preserved and land planted with indigenous wild flowers in naturalistic pattern

Dry stone walls constructed to follow contours of site and to provide screening to proposed house

Green roof with grass surface, sown with indigenous seed mix and plug planting to replicate local environment. Curved monopitch roof slope to promote visual continuity with the topography of the site

Brise-soleil providing solar shading at rear of house

Bedrooms and entrance at rear of house

Stone gabion walls at rear of site to allow house to be set low relative to existing levels at top of site and partially 'sunk' into landscape
