For the attention of Mr P Pollington

Dear Sirs,

**Highways Planning Statement
New Main Building
Barnsley College, Barnsley, South Yorkshire.**

Discussions are ongoing with the Highways Department of Barnsley Metropolitan Borough Council with regard to the scope of any Section 278 agreements required. Meetings have been held with all parties involved.

In respect of the S278 works the following details, both for permanent works and works during the construction period, have been issued to all parties for comment;

Proposed coach layby and swept path analysis on Church Street.
Swept path analysis on Eastgate to show the effects of extending the existing footpath.
Temporary arrangement of the proposed layby and swept path analysis for Church Street during construction.
Swept path analysis for the proposed new service yards off Old Mill Lane.
Swept path analysis for the proposed car park on Falcon Street.

For each area we are looking at minimising the disruption/risk to the general public.

It has also been identified that there would be an interface with the BMBC public realm works and there would need to be an agreed start point to ensure no damage occurred to the new works. The likely line would be the junction of Eastgate and Falcon Street

Regular meetings will be held at minimum 4 week intervals as part of the development process

Yours faithfully,

C D Ludlam
