15 September 2020

Dear Vicky,

NSI Reference: **GTR-00D Thurnscoe Phase 3A, Lingamore Leys, Barnsley, S63 0PG**

Thank you for registering your development with Openreach. We are delighted to inform you that your development will receive our **Fibre to the Premise (FTTP) product** free of charge.

This will provide ultrafast broadband speeds to each home and will deliver a level of broadband future proofing as the demand for speed increases.

Your customers could, depending on their choice of communications provider, benefit from speeds of up to 1Gbps enabling them to stream HDTV, play computer games and write emails simultaneously providing the best communications experience.

What you need you to do now

In order to provide ultrafast broadband infrastructure to your customers and to ensure that we get the design right first time, we need you to:

- Confirm that the details you provided at the Registration stage are correct. If not, please contact us immediately so that we can make any necessary changes.

- You have opted to self-install the connectorised cable, Optical Network Termination (ONT) within each of your properties and will be eligible for an additional rebate payment (£20) per plot

For important information for fibre installation please see our developer handbook https://www.openreach.com/fibre-broadband/fibre-for-developers/guides-and-handbooks

Yours faithfully,

Infrastructure solutions customer service team
