The Hut, Wombwell. Landscape Statement.

The Hut has a number of mature trees which have preservation orders. We will ensure the trees are well maintained and preserved in their current state. We will tend/prune as necessary but will keep their current shape etc.

The grounds are grassed and we will maintain the grass to a good level – Grass cut on a regular basis.

The perimeter boundary is brick wall and in parts this is in disrepair. We will repair and maintain the original boundary walls in their current configuration.

Our overall aim is to keep this old scout hut as original as possible and therefore will not change the current materials or site configurations.

On site car parking will be delimited with simple markings to current size regulations. Current parking areas have gravel/concrete and we will maintain these.
